1 New Developments and Decision-makings in Production and Retailing ........................................ 1
   1.1 Production and Retail Operations .............................. 1
       1.1.1 New Developments in Manufacturing .................. 1
       1.1.2 New Developments in Retailing ....................... 2
   1.2 Previous Studies on Decision-making Problems in Production and Retailing .................. 3
       1.2.1 Production Planning .............................. 4
       1.2.2 Production Scheduling .......................... 4
       1.2.3 Assembly Line Balancing ......................... 6
       1.2.4 Sales Forecasting .............................. 7
   1.3 Techniques for Decision-making Problems in Production and Retailing .......... 8
       1.3.1 Techniques for Production Optimization Problems ... 8
       1.3.2 Techniques for Sales Forecasting Problems ......... 10
   1.4 Summary ............................................. 10
   References ......................................... 10

2 Fundamentals of Intelligent Decision-Making Techniques ............... 19
   2.1 Computational Intelligence Techniques: A Brief Overview .... 19
       2.1.1 What Is CI? .................................. 20
       2.1.2 Why Do We Need CI? ......................... 20
       2.1.3 Classification of CI Techniques ................. 21
   2.2 Evolutionary Computation ................................ 22
       2.2.1 Optimum-Seeking Mechanism of Evolutionary Computation Techniques ................. 23
       2.2.2 Brief Introduction to Genetic Algorithm ........... 24
       2.2.3 Brief Introduction to Evolution Strategy .......... 25
       2.2.4 Brief Introduction to Harmony Search .............. 26
       2.2.5 Brief Introduction to Memetic Algorithm ........... 27
2.3 Feedforward Neural Networks
  2.3.1 Brief Introduction to FNNs
  2.3.2 Backpropagation Networks
  2.3.3 Extreme Learning Machine Networks
2.4 Summary
References

3 An Intelligent Optimization Model for Order Scheduling at Plant Level
  3.1 Introduction
  3.2 Problem Statement
    3.2.1 Problem Description and Assumptions
    3.2.2 Notations
    3.2.3 Mathematical Model
  3.3 Uncertain Completion and Beginning Times
    3.3.1 Completion Time of Production Process
    3.3.2 Beginning Time of Production Process
  3.4 Genetic Algorithm-Based Intelligent Optimization Approach for Order Scheduling Problem
    3.4.1 Representation
    3.4.2 Initialization
    3.4.3 Fitness and Selection
    3.4.4 Genetic Operators
    3.4.5 Termination Criterion
  3.5 Experimental Results and Discussion
    3.5.1 Experiment 1: Order Scheduling with Uncertain Processing Time
    3.5.2 Experiment 2: Order Scheduling with Uncertain Order
    3.5.3 Experiment 3: Order Scheduling with Uncertain Arrival Times
  3.6 Conclusions
Appendix
