

## Contents

Foreword ..... vii

### I. Architectures and Models

*Sven van der Meer, Joel Fleck, Martin Huddleston, Dave Raymer,  
John Strassner and Willie Donnelly*  
Technology Neutral Principles and Concepts for Autonomic Networking .. 1

*José A. Lozano López, Juan M. González Muñoz and Julio Morilla Padial*  
A Telco Approach to Autonomic Infrastructure Management ..... 27

*C. Fahy, M. Ponce de Leon, S. van der Meer, R. Marin, J. Vivero, J. Serrat,  
N. Georgalas, P. Leitner, S. Collins and B. Baesjou*  
Modelling Behaviour and Distribution for the Management of Next  
Generation Networks ..... 43

### II. Middleware and Services

*Dominic Greenwood and Roberto Ghizzioli*  
Autonomic Communication with RASCAL Hybrid Connectivity  
Management ..... 63

*Gérard Nguengang, Thomas Bullot, Dominique Gaiti, Louis Hugues  
and Guy Pujolle*  
Autonomic Resource Regulation in IP Military Networks:  
A Situatedness Based Knowledge Plane ..... 81

*Monique Calisti, Roberto Ghizzioli and Dominic Greenwood*  
Autonomic Service Access Management for Next Generation  
Converged Networks ..... 101

**III. Networks**

<i>Mohammad Abdur Razzaque, Simon Dobson and Paddy Nixon</i> Cross-layer Optimisations for Autonomic Networks .....	127
<i>Rana Rahim-Amoud, Leila Merghem-Boulahia, Dominique Gaiti and Guy Pujolle</i> An Autonomic MPLS DiffServ-TE Domain .....	149
<i>Jie Chen, Miao Pan, Kai Yu, Yang Ji and Ping Zhang</i> Game Theoretic Framework for Autonomic Spectrum Management in Heterogeneous Wireless Networks .....	169
