Contents

Part I  History, Concepts, Evolution, and Basic Features of Biological Clock

1  Origins: A Brief Account of the Ancestry of Circadian Biology . . . 3
   William J. Schwartz and Serge Daan

2  Interpreting Circadian Rhythms .................................................. 23
   Dietmar Weinert and James Waterhouse

3  Basic Principles Underlying Biological Oscillations and Their Entrainment ................................................. 47
   Theresa Floessner and Roelof A. Hut

4  Circadian Waveform and Its Significance for Clock Organization and Plasticity .................................................. 59
   Michael R. Gorman, Elizabeth M. Harrison, and Jennifer A. Evans

5  On the Origin and Implications of Circadian Timekeeping:
   An Evolutionary Perspective .......................................................... 81
   K.L. Nikhil and Vijay Kumar Sharma

Part II  Animal Clocks: Complexity and Diversity

6  The Drosophila Clock System ...................................................... 133
   Charlotte Helfrich-Förster

7  The Fish Circadian Timing System: The Illuminating Case of Light-Responsive Peripheral Clocks .............................. 177
   Cristina Pagano, Rosa Maria Ceinos, Daniela Vallone, and Nicholas S. Foulkes

xiii
8 Molecular Genetic and Genomic Analyses of Zebrafish Circadian Rhythmicity ........................................ 193
Zhaomin Zhong, Mingyong Wang, Guodong Huang, Shuqing Zhang, and Han Wang

9 The Amphibian Clock System ........................................ 211
Massimiliano Andreazzoli and Debora Angeloni

10 The Reptilian Clock System: Circadian Clock, Extraretinal Photoreception, and Clock-Dependent Celestial Compass Orientation Mechanisms in Reptiles ........................................ 223
Cristiano Bertolucci, Elena Frigato, and Augusto Foà

11 Avian Circadian Organization ........................................ 241
Vincent M. Cassone, Jiffin K. Paulose, Clifford E. Harpole, Ye Li, and Melissa Whitfield-Rucker

12 The Mammalian Neural Circadian System: From Molecules to Behaviour ........................................ 257
Beatriz Bano-Otalora and Hugh D. Piggins

Part III Human Circadian Rhythms: Entrainment and Sleep Regulation

13 Circadian Rhythms Versus Daily Patterns in Human Physiology and Behavior ........................................ 279

14 Light Resetting and Entrainment of Human Circadian Rhythms ........................................ 297
Joshua J. Gooley

15 Delayed Sleep Phase Disorder: Mechanisms and Treatment Approaches ........................................ 315
Jade M. Murray, Tracey L. Sletten, Michelle Magee, and Shantha M.W. Rajaratnam

Part IV Clock Interactions Within and Between Individual and the Natural World

16 Interaction Between Central and Peripheral Clocks in Mammals ........................................ 337
Ueli Schibler

17 Circadian Photoentrainment Mechanism in Mammals ........................................ 365
Yu Hsin Liu and Satchidananda Panda
18 Mechanisms of Non-photic Entrainment ...................... 395
Emma J. Wams, Sjaak J. Riede, Ivor Laan, Tim Bulte, and Roelof A. Hut

19 Temperature Input for Rhythmic Behaviours in Flies:
The Role of Temperature-Sensitive Ion Channels ............... 405
Antara Das and Vasu Sheeba

Part V Circadian Clocks, Metabolism, and Immune Functions

20 Circadian Clocks, Metabolism, and Food-Entrained Rhythms . . . 427
Rohit Chavan, Urs Albrecht, and Takashi Okabe

21 Circadian Regulation of Metabolism in Health and Diseases . . . 443
Breanna Sarkisian, Neelu Jain Gupta, and Satchidananda Panda

22 Circadian Clocks and Immune Functions ....................... 459
Chloé C. Nobis, Silke Kiessling, Nathalie Labrecque, and Nicolas Cermakian

23 Clock Genes and Cancer ........................................ 481
Silke Kiessling and Nicolas Cermakian

Part VI Pineal, Melatonin, and Biological Timekeeping

24 The Timezyme and Melatonin: Essential Elements of Vertebrate Timekeeping ........................................ 503
Surajit Ganguly and David C. Klein

Amit Kumar Trivedi, Devraj Singh, Anand Shankar Dixit, and Vinod Kumar

Part VII Circannual Rhythms, Photoperiodism, and Seasonal Behavior

26 Circannual Rhythms Anticipate the Earth’s Annual Periodicity . . 545
Barbara Helm and Gerald A. Lincoln

27 Seasonal Changes in Brain and Behavior ........................ 571
Gregory F. Ball, Beau A. Alward, and Jacques Balthazart

28 Molecular Mechanism Regulating Seasonality .................. 589
Keisuke Ikegami and Takashi Yoshimura

29 Epigenetic Mechanisms Regulating Circannual Rhythms ........ 607
Tyler J. Stevenson and Gerald A. Lincoln
