Contents

Part I  SGS modeling and discretization errors

Error-landscape assessment of large-eddy simulations: a review
Johan Meyers .................................................. 3

Numerical and physical instabilities in massively parallel LES of reacting flows
Dr Thierry Poinset ................................................ 15

Quality Issues of Combustion LES
A. M. Kempf, M. Pettit .......................................... 33

Energy cascade and spatial fluxes of filtered wall-turbulent flows
A. Cimarelli, E. De Angelis ........................................ 47

A computational study of turbulent flow separation for a circular cylinder using skin friction boundary conditions
Johan Hoffman, Niclas Jansson .................................. 57

LES-SSAM for a high Reynolds number turbulent channel flow
Remi Zamansky, Ivana Vinkovic, Mikhail Gorokhovski ................. 69

A new development of the dynamic procedure for the integral-based implicit filtering in large-eddy simulation
Filippo M. Denaro, Giuliano De Stefano .......................... 79

Reduced interaction between numerical and model errors through anisotropic filtering
Marcello Meldi, Federico Perini .................................. 91

Analysis of the subgrid models in the flow between rotating discs
Artur Tyliszczak, Andrzej Boguslawski .......................... 101

Extension of LES approaches to conductive fluids and plasmas
P. Morel, D. Carati, F. Merz, T. Görler, F. Jenko ............................... 241

Part II Assessment and reduction of computational errors

Grid Design and the Fate of Eddies in External Flows
Philippe R. Spalart, Mikhail Kh. Strelets, Andrey Garbaruk ................. 253

How to estimate the resolution of an LES of recirculating flow
Lars Davidson ................................................................. 269

Quality assessment of Dynamic Finite Difference schemes on the
Taylor-Green Vortex
Dieter Fauconnier, Chris De Langhe, Erik Dick ............................. 287

Stochastic Coherent Adaptive Large-Eddy Simulation with explicit
filtering
Giuliano De Stefano, Oleg V. Vasilyev .................................... 297

Error reduction in LES via adaptive moving grids
Claudia Hertel, Jochen Fröhlich ............................................. 309

Influence of Reynolds number and grid resolution on large-eddy
simulations of self-similar jets based on relaxation filtering
Christophe Bogey, Christophe Bailly ..................................... 319

An Examination of the Spatial Resolution Requirements for LES of a
Compressible Jet
James R. DeBonis ............................................................ 329

A Computational Uncertainty Analysis of LES/DNS: towards building a
reliable engineering turbulence prediction capability
Hongyi Xu ................................................................. 339

Computational error-minimization for LES of non-premixed turbulent
combustion
Bernard J. Geurts, Andreas Kempf ......................................... 351

Assessment of eddy resolving techniques for the flow over periodically
arranged hills up to Re=37,000
Michael Manhart, Christoph Rapp, Nikolaus Peller, Michael Breuer, Orhan
Aybay, Jordan A. Denev, Carlos J. Falconi .................................. 361

Part III Mathematical analysis and foundation for SGS modeling

From suitable weak solutions to entropy viscosity
Jean-Luc Guermond, Richard Pasquetti, Bojan Popov ........................ 373
A new deconvolution approach
Massimo Germano ................................................ 391

Horizontal Approximate Deconvolution for Stratified Flows: Analysis and Computations
Luigi C. Berselli, Traian Iliescu, Tamay Özgökmen .............................. 399

The effect of subfilter-scale physics on regularization models
Jonathan Pietarila Graham, Darryl Holm, Pablo Mininni, Annick Pouquet . . . . 411

When does eddy viscosity damp subfilter scales sufficiently?
Roel Verstappen ......................................................... 421
Quality and Reliability of Large-Eddy Simulations II
Salvetti, M.V.; Geurts, B.; Meyers, J.; Sagaut, P. (Eds.)
2011, XVIII, 430 p., Hardcover
