

# Contents

<b>A Discontinuous Potential Model for Protein–Protein Interactions. . . . .</b>	<b>1</b>
Qing Shao and Carol K. Hall	
<b>Probing How Defects in Self-assembled Monolayers Affect Peptide Adsorption with Molecular Simulation. . . . .</b>	<b>21</b>
K.G. Sprenger, Yi He and Jim Pfaendtner	
<b>Development of a Coarse-Grained Water Forcefield via Multistate Iterative Boltzmann Inversion . . . . .</b>	<b>37</b>
Timothy C. Moore, Christopher R. Iacovella and Clare McCabe	
<b>Optimizing Molecular Models Through Force-Field Parameterization via the Efficient Combination of Modular Program Packages . . . . .</b>	<b>53</b>
Marco Hülsmann, Karl N. Kirschner, Andreas Krämer, Doron D. Heinrich, Ottmar Krämer-Fuhrmann and Dirk Reith	
<b>A Hierarchical, Component Based Approach to Screening Properties of Soft Matter . . . . .</b>	<b>79</b>
Christoph Klein, János Sallai, Trevor J. Jones, Christopher R. Iacovella, Clare McCabe and Peter T. Cummings	
<b>Quantum Virial Coefficients via Path Integral Monte Carlo with Semi-classical Beads . . . . .</b>	<b>93</b>
Ramachandran Subramanian, Andrew J. Schultz and David A. Kofke	
<b>Homogeneous Nucleation of [dmim<sup>+</sup>][Cl<sup>-</sup>] from its Supercooled Liquid Phase: A Molecular Simulation Study. . . . .</b>	<b>107</b>
Xiaoxia He, Yan Shen, Francisco R. Hung and Erik E. Santiso	

<b>Influence of the Precursor Composition and Reaction Conditions on Raney-Nickel Catalytic System</b> . . . . .	125
Sabine Schweizer, Robin Chaudret, Theodora Spyriouni, John Low and Lalitha Subramanian	
<b>Atomistic Modeling and Simulation for Solving Gas Extraction Problems</b> . . . . .	137
Genri E. Norman, Vasily V. Pisarev, Grigory S. Smirnov and Vladimir V. Stegailov	
<b>Atomistic Simulations of CO<sub>2</sub> During “Trapdoor” Adsorption onto Na-Rho Zeolite</b> . . . . .	153
Nathan Bamberger and Daniela Kohen

Foundations of Molecular Modeling and Simulation

Select Papers from FOMMS 2015

Snurr, R.Q.; Adjiman, C.S.; Kofke, D.A. (Eds.)

2016, XIV, 168 p. 66 illus., 57 illus. in color., Hardcover

ISBN: 978-981-10-1126-9
