Contents

Advanced Fuzzy and Neural Network Theory and Algorithms

A Robust Fuzzy c-Means Clustering Algorithm for Incomplete Data . . . . . . . . 3
   Jinhua Li, Shiji Song, Yuli Zhang, and Kang Li

Multi-objective Optimization Improved GA Algorithm and Fuzzy
PID Control of ATO System for Train Operation . . . . . . . . . . . . . . . . . . . . 13
   Longda Wang, Xingcheng Wang, Dawei Sun, and Hua Hao

Research on AGV Trajectory Tracker Based on Fuzzy Control . . . . . . . . . . 23
   Tongqing Feng and Bin Jiao

Stability Determination Method of Flame Combustion Based
on Improved BP Model with Hierarchical Rate . . . . . . . . . . . . . . . . . . . . 33
   Rongbao Chen, Zipei Cao, and Benxian Xiao

A Genetic Neural Network Approach for Production Prediction
of Trailing Suction Dredge . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 44
   Zhen Su, Jingqi Fu, and Jian Sun

Orthogonal Matching Pursuit for Multilayer Perceptions Neural
Networks Model Reduction . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 53
   Xiaoquan Tang, Xiaolin Wang, and Long Zhang

Advanced Evolutionary Methods and Applications

A Fault Diagnosis Method of Gear Based on SVD and Improved EEMD . . . . 65
   Mengmeng Song and Shungen Xiao

Research on Fault Data Wavelet Threshold Denoising Method
Based on CEEMDAN . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 75
   Zhouqun Liu and Guochu Chen

Evaluation of K-SVD Embedded with Modified ℓ1-Norm Sparse
Representation Algorithm . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 84
   Meixi Wang, Jingjing Liu, Shiwei Ma, and Wanquan Liu

Study on Path Planning of Unmanned Vehicle Based on Kinematic
and Dynamic Constraints . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 94
   Li Li, Benshan Zhong, and Ziyan Geng
An LMI Approach to Iterative Learning Control Based on JITL for Batch Processes .......................................................... 212
   Liuming Zhou and Li Jia

Theme-Based Spider for Academic Paper .................................... 223
   Peifeng Yin, Qiyu Shao, Xingfu Wang, Weihua Wang, Fuyou Miao, and Chenxi Shao

Iterative Learning Identification with Bias Compensation for Stochastic Linear Time-Varying Systems .................................. 231
   Fazhi Song, Yang Liu, Zhile Yang, Xiaofeng Yang, and Ping He

A Skylight Opening Prediction Method Based on Parallel Dirichlet Process Mixture Model Clustering ........................................ 240
   Yue Yu, Li Deng, Lili Wang, and Honglin Pang

Two-Layer Harmony Search Algorithm for a Robust Flow Shop Scheduling Problem ...................................................... 252
   Bo Wu, Bing Wang, and Xingbao Han

Heuristic Based Terminal Iterative Learning Control of ISBM Reheating Processes ......................................................... 262
   Ziqi Yang, Zhile Yang, Kang Li, Wasif Naeem, and Kailong Liu

Advanced Machine Learning Methods and Applications

Application of LSSVM in Performance Test of Pneumatic Valves .... 275
   Jiayuan Li and Wei Sun

A Two-Stage Optimal Detection Algorithm Research for Pedestrians in Front of the Vehicles .............................................. 282
   Yunlian Shao, Mei-hua Xu, Feng Ran, and Dong-yang Shen

Collision Free Path Planning for Welding Robot Based on CG-MOPSO ..................................................... 293
   Xuewu Wang, Yixin Yan, and Xingsheng Gu

Taxi Driving Anomalous Route Detection Using GPS Sampling Data ................................................................. 304
   Zhiguo Ding

Study on Flame Combustion Stability Based on Particle Swarm Optimization Feature-Weighted SVM .......................... 313
   Rongbao Chen, Honghui Jiang, and Yang Liu

Study on Lamb Wave Dispersion Curves for the Testing of Metal Plates .................................................. 324
   Jinggang Xu and Jingshan Deng
Automatic Character Detection System for IC Test Handler Based on Active Learning SVM

Tianshan Wang, Fan Jiang, Xiaojin Zhu, Hesheng Zhang, and Zhiyuan Gao

Active RFID Tags for Smart Shelf Based on LF Assistant Devices

Bing Bai, Xiaojin Zhu, Hesheng Zhang, and Zhaoxun Zhang

Mean Squared Error vs. Frame Potential for Unsupervised Variable Selection

Federico Zocco and Seán McLoone

Zero-Shot Image Classification via Coupled Discriminative Dictionary Learning

Lehui Liu, Songsong Wu, Runqing Chen, and Mengquan Zhou

Multivariate Fault Isolation in Presence of Outliers Based on Robust Nonnegative Garroto

Jianguo Wang, Zhifu Deng, Banghua Yang, Shiwei Ma, Minrui Fei, Yuan Yao, and Tao Chen

Intelligent Modeling, Monitoring, and Control of Complex Nonlinear Systems

Secant Method Based U-Model Identification and Generalized Predictive Controller for Nonlinear Dynamic Systems

Ting Zhou, Jie Ding, and Hui Deng

Research on Nonlinear Lamb Wave Based Structural Damage Monitoring

Qiang Wang, Dongchen Ji, and Chen Zhou

Second-Order Average Consensus with Buffer Design in Multi-agent System with Time-Varying Delay

Junxian Yang, Li Hui, Peidong Wang, and Yang Li

Adaptive Consensus-Based Distributed Target Tracking in Sensor Networks

Xue Zhou, Hao Zhang, and Huaicheng Yan

Event-Triggered Consensus Tracking Control of Multi-agent Systems with Lipschitz-Type Dynamics

Yang Yang and Dong Yue

Formation Problem of Second-Order Multi-agent Systems with Input Delay and Communication Delay

Yun Chai and Ke-cai Cao
Fault Estimation Observer Design of Nonlinear Systems with Actuator Faults

Xiangpeng Xie and Yanan Liu

Advanced Methods for Networked Systems

Stability Analysis of Event-Triggered Networked Control Systems with Time-Varying Sampling

Huaibin Xie and Songlin Hu

State Estimation-Based Security Control for Networked Systems Under Hybrid Attacks

Hao Zhang, Chen Peng, and Hongtao Sun

Hopf Bifurcation in a Delayed Two-Neuron Fractional Network with Incommensurate-Order

Lingzhi Zhao, Beibei Shi, and Min Xiao

Networked Control System Based on LQ Tracking and Response Strategy Under Data Injection Attack

Xinchun Jie, Minrui Fei, Dajun Du, and T.C. Yang

Filtering for Stochastic Systems with Transmission Delays and Out-of-Order Packets

Li Liu, Aolei Yang, Wenju Zhou, Qiang Tao, Xiaowei Tu, and Jun Yue

Local Bifurcation Analysis of a Fractional-Order Dynamic Model of Genetic Regulatory Networks with Delays

Qingshan Sun, Min Xiao, Lingzhi Zhao, and Binbin Tao

$l_2/l_\infty$ Filtering for Wireless Networked Control Systems with Communication Constraints and Packet Losses

Li-sheng Wei and Yun-qiang Ma

Observer-Based $H_\infty$ Output Feedback Control for Switched Systems with Sojourn Probability Method

Lei Wang, Juan Li, Engang Tian, and Yinghui Hu

Event-Triggered Communication and $H_\infty$ Filtering Co-design for Networked Control Systems

Weili Shen, Jingqi Fu, Jie Wu, Weihua Bao, and Zhengming Gao

State Estimation for Discrete-Time Complex Dynamical Networks with Markovian Packet Losses

Shengnan Cao and Youhong Wan

Coverage and Control of Diffusion Process in Cyber-Physical Systems

Ke-cai Cao, Fujiao Zhou, and Minglou Qian
Jamming Attacks Against Control Systems: A Survey
Yanbo Dong and Peng Zhou

State Estimation for Complex Network with One Step Induced Delay
Based on Structural Controllability and Pinning Control.
Wei Wang, Youhong Wan, and Xinyuan Liang

Design of Output Feedback Controller for Networked Control Systems
with Delay and Packet Dropout
Jun Xiang Dai, Ying Zhou, Chao Sun, and Jin Xing Lin

Distributed Economic Dispatch Based on Consensus Algorithm
Under Event-Triggered Mechanism
Shengxuan Weng, Dong Yue, and Chongxin Huang

Control and Analysis of Transportation Systems

MTMDs-Based Noise Control for Box-Girder Bridge of High
Speed Railway
Xiaoan Zhang, Guangtian Shi, Jianjin Yang, and Xiaoyun Zhang

Influences of Stiffness of Rail Pads on System Dynamic Performances
of Heavy Haul Railway
Guangtian Shi, Kaiyun Wang, Qianxing Huang, and Xiaoyun Zhang

Passing Control Between Driver and Highly Automated
Driving Functions
Niko Maas, Frédéric Etienne Kracht, Mira Schüller, Weiyan Hou,
and Dieter Schramm

Advanced Sliding Mode Control and Applications

Noise Observer Based Sliding Mode Control for Time-Varying
Delay Systems
Yanliang Cui, Guangtian Shi, Lanlan Xu, Xiaoan Zhang, and Xue Li

Research on Speed Identification of Induction Motor Based
on Sliding Mode Observer
Qiwei Xu, Meng Zhao, Xiaoxiao Luo, Xiaobiao Jiang, Yunqi Mao,
Weidong Chen, and Yiming Su

Integral Sliding Mode Based Precision Motion Control for PMLM
Yang Liu, Hao Luo, Zhile Yang, Zhenxian Fu, and Xiaofeng Yang
Advanced Analysis of New Materials and Devices

Magnetic Field Measurement Instrument Based on Asymmetric Giant Magneto-Impedance Effect ......................................................... 677
   Feng Jiang and Shulin Liu

Analysis of Effective Transmission Distance of Double Transmitters in Magnetic Coupled Resonant WPT System .............................. 686
   Nenghong Xia, Menglin Tian, Haisheng Lian, and Yimin Zhu

Analysis on Al-Cu Dissimilar Materials Friction Stir Welding Butt Joint Based on J Integral Model ................................................... 695
   Hongyu Sun, Jun Zhu, Shun Guo, Yong Peng, Qi Zhou, Jun Huang, and Yushan Chen

Pinched Hysteresis Loop Characteristics of a Fractional-Order HP TiO₂ memristor ................................................................. 705
   Min Shi and Songlin Hu

Author Index ........................................................................................................... 715
Intelligent Computing, Networked Control, and Their Engineering Applications
Yue, D.; Peng, C.; Du, D.; Zhang, T.; Zheng, M.; Han, Q. (Eds.)
2017, XIX, 717 p. 358 illus., Softcover
