ADVANCES IN NEURODEVELOPMENTAL DISORDERS
Multidisciplinary Research and Practice Across the Life Span
Editor in Chief: Nirbhay N. Singh

AIMS & SCOPE

A multidisciplinary and multitheoretical journal that publishes papers from specialties across the behavioral and social sciences, using quantitative and mixed-methods research techniques.

- Focuses on research in neurodevelopmental disorders, especially intellectual and developmental disabilities, across the lifespan
- Covers a range of issues, populations, and domains, including diagnosis, incidence and prevalence, assessment, interventions, and much more
- Includes animal models of basic research that advance understanding and treatment of neurodevelopmental disorders

Advances in Neurodevelopmental Disorders publishes high-quality research in the broad area of neurodevelopmental disorders across the lifespan. Study participants may include individuals with:

- Intellectual and developmental disabilities
- Global developmental delay
- Communication disorders
- Language disorders
- Speech sound disorders
- Childhood-onset fluency disorders (e.g., stuttering)
- Social (e.g., pragmatic) communication disorders
- Unspecified communication disorders
- Autism spectrum disorder (ASD)
- Attention-deficit/hyperactivity disorder (ADHD), specified and unspecified
- Specific learning disorders
- Motor disorders
- Developmental coordination disorders
- Stereotypic movement disorder
- Tic disorders, specified and unspecified
- Other neurodevelopmental disorders, specified and unspecified
CALL FOR PAPERS

Submit papers in any area of Neurodevelopmental Disorders, especially in intellectual and developmental disabilities. Papers may also include participants with neurodegenerative disorders that lead to a decline in intellectual functioning, including Alzheimer’s disease, amyotrophic lateral sclerosis, Creutzfeldt-Jakob disease, vascular dementia, Lewy body dementia, frontotemporal dementia, corticobasal degeneration, Huntington’s disease, and progressive supranuclear palsy. The journal includes empirical, theoretical and review papers on a large variety of issues, populations, and domains, including but not limited to: diagnosis; incidence and prevalence; and educational, pharmacological, behavioral and cognitive behavioral, mindfulness, and psychosocial interventions across the life span. Animal models of basic research that inform the understanding and treatment of neurodevelopmental disorders are also welcomed. The journal is multidisciplinary and multi-theoretical, and encourages research from multiple specialties in the social sciences using quantitative and mixed-method research methodologies.

Why submit your research to Advances in Neurodevelopmental Disorders?

- Play a pivotal role in launching this important new journal.
- Rapid review and response: Work directly with the Editor in Chief and Associate Editors to ensure you get timely feedback and results.
- Fast-track publication: Corrected proofs are published in Online First within weeks of acceptance.
- Timely online and print publication.
- Available in libraries worldwide and through most academic electronic search engines.
- Multidisciplinary: Addresses the research interests of a broad audience, including researchers, professors, clinicians, and related professionals/practitioners in developmental and clinical psychology, neuroscience, psychiatry, public health, and social sciences.
- Thorough coverage: Advances in Neurodevelopmental Disorders accepts electronic data and multimedia files (e.g., animations, movies, audio) and other supplementary files to be published online along with an article. This feature, known as Springer's Electronic Supplementary Material, enables authors to add dimension to the their articles, including information that cannot be accommodated within the confines of an issue or is more convenient to readers in electronic form.
