Welcome Note

The Conference will aim to deal with all aspects related to early diagnosis, 120 to 139 mm Hg and 85 to 89 mm Hg, respectively. New treatment strategies for systolic and diastolic BP: revised a new BP category of prehypertension for systolic and diastolic BP; the seventh report of the Joint National Committee on the treatment and detection of high BP and treatment of high BP. The ESH report of 2006 defined it as hypertension. The conference will deal with all aspects related to early diagnosis, including innovative technologies and treatments. The conference will bring together professionals from the fields of Hypertension, Diabetes, Lipidology, Cardiology, Nephrology, Endocrinology, Internal Medicine, Family Practice and Pharmacology.

Systolic blood pressure (BP) of less than 140 mm Hg and diastolic BP less than 90 mm Hg were for years considered as normal. Mounting evidence suggests that BP in the high reference range is associated with an increased risk of cardiovascular disease. The conference will take place in Barcelona, Spain, from January 31 - February 3, 2013. The conference will be an educational event and look forward to welcoming you to Barcelona.
