MANUSCRIPT SUBMISSION – BRAIN IMAGING AND BEHAVIOR

Submit electronically to Brain Imaging and Behavior at: https://www.editorialmanager.com/bior/
Electronic submission substantially reduces the editorial processing and reviewing times and shortens overall publication times.

Submission of a manuscript implies: that the work described has not been published before; that it is not under consideration for publication anywhere else; that its publication has been approved by all co-authors, if any, as well as by the responsible authorities – tacitly or explicitly – at the institute where the work has been carried out. The publisher will not be held legally responsible should there be any claims for compensation.

Types of Submissions Considered

**Regular Articles:** The majority of journal pages are devoted to the publication of original empirical articles, such as reports of randomized controlled trials, observational studies, or other basic and clinical investigations. Quantitative or descriptive and integrative literature reviews will also be considered. Manuscripts should clearly state an objective or hypothesis, the research methods (including statistical methods), the essential features of any interventions, the outcome measures, and the results of the investigation. The results should be discussed in the context of other published literature. Regular articles do not have word or page limitations, but please assure that your manuscript is written clearly and concisely.

**Brief Reports:** Brain Imaging and Behavior accepts brief reports of soundly designed research studies of specialized interest that can be effectively communicated in less space than standard-length articles. An author who submits a Brief Report must agree not to submit the full report to another journal. Brief Report submissions should not exceed 15 double-spaced pages (including title page, abstract, references, tables, and figures).

**Letters to the Editor:** Brain Imaging and Behavior publishes Letters to the Editor that offer opinion or interpretation of articles previously published in the journal. Letters should be limited to 500 words or less and should not have more than seven references. Tables and figures should be used only if absolutely necessary. Letters will be sent to the author(s) of the original work and the authors’ response may be published as a companion to the Letter to the Editor.

**Invited Commentary:** On occasion, the Editor will invite a brief commentary to highlight a specific article that will appear in the same issue of the journal. The goal of the commentary is to place the article in the wider research context and to discuss further opportunities for research in the area. Commentaries must be no more than 500 words and may include one Figure or Table.

**Special Issues:** We sometimes feature a group of related articles that together create a Special Issue. SI’s are typically overseen and published by Guest Editors. Please contact us at brain.imaging.and.behavior@gmail.com if you are interested in guest editing a special issue.
Permissions

Authors wishing to include figures, tables, or text passages that have already been published elsewhere are required to obtain permission from the copyright owner(s) for both the print and online format and to include evidence that such permission has been granted when submitting their papers. Any material received without such evidence will be assumed to originate from the authors.

Ethical standards

Conflict of interest
When authors submit a manuscript, they are responsible for disclosing all financial and personal relationships that might bias their work. To prevent ambiguity, authors must state explicitly whether potential conflicts do or do not exist. Each author must indicate whether or not they have a financial relationship with the organization that sponsored the research. For each source of funds, both the research funder and the grant number should be given.

Conflict of interest statements should be present on every manuscript before the References section. The statement should mention each author separately by name.

Recommended wording is as follows:

- Author X declares that he has no conflict of interest.
- Author Y has received research grants from Drug Company A.
- Author Z has received a speaker honorarium from Drug Company B and owns stock in Drug Company C.

If multiple authors declare no conflict, this can be done in one sentence:
Author X, Author Y and Author Z declare that they have no conflict of interest.

Please see Springer's Conflict of Interest Statement.

Informed consent
For studies with human subjects, please include the following statement before the References section:

'All procedures followed were in accordance with the ethical standards of the responsible committee on human experimentation (institutional and national) and with the Helsinki Declaration of 1975, and the applicable revisions at the time of the investigation. Informed consent was obtained from all patients for being included in the study.'

If any identifying information about patients is included in the article, the following sentence should also be included:

'Additional informed consent was obtained from all patients for which identifying information is included in this article.'

Please see Springer's Informed Consent Statement.
Animal Studies
For studies with animals, include the following sentence in the manuscript before the References section:

'All institutional and national guidelines for the care and use of laboratory animals were followed.'

Non-Human and Non-Animal Research
If the authors did not carry out animal and/or human studies as part of their article they must include the following statement in the manuscript before the References section:

'No animal or human studies were carried out by the authors for this article.'

Please see Springer's Human and Animal Rights Statement.

The editors reserve the right to reject manuscripts that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or failure to fulfill the above-mentioned requirements.

FORMATTING THE DOCUMENT

Manuscripts should be submitted in Word.
Manuscripts with mathematical content can also be submitted in LaTeX: \LaTeX\ macro pkg

- Use 12-point Times New Roman, Helvetica, or Arial.
- Use \textit{italics} for emphasis.
- Use standard American English (e.g. behavior, color, analyze, center, labeled)
- Use the automatic page numbering function to number the pages.
- Do not use field functions.
- Use tab stops or other commands for indents, not the space bar.
- Use the table function, not spreadsheets, to make tables.
- Use the equation editor or MathType for equations.
- Save your file in .docx format (Word 2007 or higher) or .doc format (older Word versions).

Initial submissions do not require a cover letter. If you would like to submit such a letter, please include it as the first page of your manuscript.

Title Page

- A concise and informative title
- Name(s) of the author(s)
- The e-mail address and telephone/fax numbers of the corresponding author

Please be sure that author affiliations and contact information are entered correctly in the electronic forms.
Abstract

Please provide an abstract of 150 to 250 words. The abstract should not contain any undefined abbreviations or unspecified references.

Keywords

Please provide 4 to 6 keywords to be used for indexing purposes.

Headings

Please use no more than three levels of displayed headings. Typically, major headings are: Background, Methods (subheadings: Participants, Procedure), Results, and Discussion.

Abbreviations

Abbreviations should be defined at first mention and used consistently thereafter.

Footnotes

Footnotes can be used to give additional information, which may include the citation of a reference included in the reference list. They should not consist solely of a reference citation, and they should never include the bibliographic details of a reference. They should also not contain any figures or tables.

Footnotes to the text are numbered consecutively; those to tables should be indicated by superscript lower-case letters (or asterisks for significance values and other statistical data). Footnotes to the title or the authors of the article are not given reference symbols. Always use footnotes instead of endnotes.

Acknowledgments

Acknowledgments of people, grants, funds, etc. should be placed in a separate section before the reference list. The names of funding organizations should be written in full.

Disclosures

Please see the “Ethical Standards” section above for proposed wording.
References

Cite references in the text by name and year in parentheses. Some examples:

- Negotiation research spans many disciplines (Thompson 1990).
- This result was later contradicted by Becker and Seligman (1996).
- This effect has been widely studied (Abbott 1991; Barakat et al. 1995; Kelso and Smith 1998; Medvec et al. 1999).

The list of references should only include works that are cited in the text and that have been published or accepted for publication. Personal communications and unpublished works should only be mentioned in the text. Do not use footnotes/endnotes as a substitute for a reference list. Reference list entries should be alphabetized by the last names of the first author of each work.

Endnote
For authors using EndNote, Springer provides an output style that supports the formatting of in-text citations and reference list: Endnote style (zip, 3 kB)

Example Reference Listings

Journal names and book titles should be italicized.

v. 01-12-14
Tables

- All tables are to be numbered using Arabic numerals.
- Tables should always be cited in text in consecutive numerical order.
- Please supply a caption for each table explaining the components of the table.
- Identify any previously published material by giving the original source in the form of a reference at the end of the table caption.
- Footnotes to tables should be indicated by superscript lower-case letters (or asterisks for significance values and other statistical data) and included beneath the table body.

Artwork

For the best quality final product, it is highly recommended that you submit all of your artwork – photographs, line drawings, etc. – in an electronic format. Your art will then be produced to the highest standards with the greatest accuracy to detail. The published work will directly reflect the quality of the artwork provided.

*There is no charge for color artwork published in Brain Imaging and Behavior.*

Electronic Figure Submission

- Supply all figures electronically.
- Indicate what graphics program was used to create the artwork.
- For vector graphics, the preferred format is EPS; for halftones, please use TIFF format. MS Office files are also acceptable.
- Vector graphics containing fonts must have the fonts embedded in the files.
- Name your figure files with "Fig" and the figure number, e.g., Fig1.eps.

Line Art

- Definition: Black and white graphic with no shading.
- Do not use faint lines and/or lettering and check that all lines and lettering within the figures are legible at final size.
- All lines should be at least 0.1 mm (0.3 pt) wide.
- Scanned line drawings and line drawings in bitmap format should have a minimum resolution of 1200 dpi.
- Vector graphics containing fonts must have the fonts embedded in the files.
Halftone Art

- Definition: Photographs, drawings, or paintings with fine shading
- If any magnification is used in the photographs, indicate this by using scale bars within the figures themselves.
- Halftones should have a minimum resolution of 300 dpi.

Combination Art

- Definition: a combination of halftone and line art, e.g., halftones containing line drawing, extensive lettering, color diagrams
- Combination artwork should have a minimum resolution of 600 dpi.

Color Art

- Color art is free of charge for online publication.
- If black and white will be shown in the print version, make sure that the main information will still be visible. Many colors are not distinguishable from one another when converted to black and white. A simple way to check this is to make a xerographic copy to see if the necessary distinctions between the different colors are still apparent.
- If the figures will be printed in black and white, do not refer to color in the captions.
- Color illustrations should be submitted as RGB (8 bits per channel).

Figure Lettering

- It is best to use Helvetica or Arial (sans serif fonts).
- Keep lettering consistently sized throughout, usually about 2–3 mm (8–12 pt), keeping variance to a minimum. (Do not use 8pt type on an axis and 20pt type for the axis label.)
- Avoid effects such as shading, outline letters, etc.
• Do not include titles or captions within your illustrations.

**Figure Numbering**

• All figures are to be numbered using Arabic numerals.
• Figures should always be cited in text in consecutive numerical order.
• Figure parts should be denoted by lowercase letters (a, b, c, etc.).
• If an appendix appears in your article and it contains one or more figures, continue the consecutive numbering of the main text. Do not number the appendix figures, "A1, A2, A3, etc." Figures in online appendices (Electronic Supplementary Material) should, however, be numbered separately.

**Figure Captions**

• Each figure should have a concise caption describing accurately what the figure depicts. Include the captions in the text file of the manuscript, not in the figure file.
• Figure captions begin with the term Fig. in bold type, followed by the figure number, also in bold type.
• No punctuation is to be included after the number, nor is any punctuation to be placed at the end of the caption.
• Identify all elements found in the figure in the figure caption; and use boxes, circles, etc., as coordinate points in graphs.
• Identify previously published material by giving the original source in the form of a reference citation at the end of the figure caption.

**Figure Placement and Size**

• When preparing your figures, size figures to fit in the column width.
• For most journals the figures should be 39 mm, 84 mm, 129 mm, or 174 mm wide and not higher than 234 mm.
• For books and book-sized journals, the figures should be 80 mm or 122 mm wide and not higher than 198 mm.

**Permissions**

If you include figures that have already been published elsewhere, you must obtain permission from the copyright owner(s) for both the print and online format. Please be aware that some publishers do not grant electronic rights for free and that Springer will not be able to refund any costs that may have occurred to receive these permissions. In such cases, material from other sources should be used.
Accessibility

In order to give people of all abilities and disabilities access to the content of your figures, please make sure that

- All figures have descriptive captions (blind users could then use a text-to-speech software or a text-to-Braille hardware)
- Patterns are used instead of or in addition to colors for conveying information (color-blind users would then be able to distinguish the visual elements)
- Any figure lettering has a contrast ratio of at least 4.5:1

Electronic Supplementary Material

Springer accepts electronic multimedia files (animations, movies, audio, etc.) and other supplementary files to be published online along with an article or a book chapter. This feature can add dimension to the author's article, as certain information cannot be printed or is more convenient in electronic form.

Submission

- Supply all supplementary material in standard file formats.
- Please include in each file the following information: article title, journal name, author names; affiliation and e-mail address of the corresponding author.
- To accommodate user downloads, please keep in mind that larger-sized files may require very long download times and that some users may experience other problems during downloading.

Audio, Video, and Animations

- Always use MPEG-1 (.mpg) format.

Text and Presentations

- Submit your material in PDF format; .doc or .ppt files are not suitable for long-term viability.
- A collection of figures may also be combined in a PDF file.

Spreadsheets

- Spreadsheets should be converted to PDF if no interaction with the data is intended.
- If the readers should be encouraged to make their own calculations, spreadsheets should be submitted as .xls files (MS Excel).
Specialized Formats

- Specialized format such as .pdb (chemical), .wrl (VRML), .nb (Mathematica notebook), and .tex can also be supplied.

Collecting Multiple Files

- It is possible to collect multiple files in a .zip or .gz file.

Numbering

- If supplying any supplementary material, the text must make specific mention of the material as a citation, similar to that of figures and tables.
- Refer to the supplementary files as “Online Resource”, e.g., "... as shown in the animation (Online Resource 3)", “... additional data are given in Online Resource 4”.
- Name the files consecutively, e.g. “ESM_3.mpg”, “ESM_4.pdf”.

Captions

- For each supplementary material, please supply a concise caption describing the content of the file.

Processing of supplementary files

- Electronic supplementary material will be published as received from the author without any conversion, editing, or reformatting.

Accessibility

In order to give people of all abilities and disabilities access to the content of your supplementary files, please make sure that
- The manuscript contains a descriptive caption for each supplementary material
- Video files do not contain anything that flashes more than three times per second (so that users prone to seizures caused by such effects are not put at risk)
Resubmissions

Resubmissions should include a cover letter in which you address each of the reviewers’ concerns point-by-point. This document will need to be uploaded in addition to your revised work. Be sure to track or highlight changes in your revised document so that reviewers and editorial staff will be able to easily identify the changes you have made.

English Language Support

Manuscripts that are accepted for publication will be checked by our copyeditors for spelling and formal style. This may not be sufficient if English is not your native language and substantial editing would be required. In that case, you may want to have your manuscript edited by a native speaker prior to submission. A clear and concise language will help editors and reviewers concentrate on the scientific content of your paper and thus smooth the peer review process.

Edanz Editing Global provides language editing for scientific articles in all areas published by Springer. Use of an editing service is neither a requirement nor a guarantee of acceptance for publication. Please contact the editing service directly to make arrangements for editing and payment.

For Authors from China

文章在投稿前进行专业的语言润色将对作者的投稿进程有所帮助。作者可自愿选择使用Springer推荐的编辑服务，使用与否并不作为判断文章是否被录用的依据。提高文章的语言质量将有助于审稿人理解文章的内容，通过对学术内容的判断来决定文章的取舍，而不会因为语言问题导致直接退稿。作者需自行联系Springer推荐的编辑服务公司，协商编辑事宜。

After Acceptance

Upon acceptance of your article you will receive a link to the special Author Query Application at Springer’s web page where you can sign the Copyright Transfer Statement online and indicate whether you wish to order OpenChoice, offprints, or printing of figures in color.

Once the Author Query Application has been completed, your article will be processed and you will receive the proofs.

**Open Choice:** In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer provides an alternative publishing option: [Springer Open Choice](#). A Springer Open Choice article receives all the benefits of a regular subscription-based article, but in addition is made available publicly through Springer’s online platform SpringerLink.

**Copyright transfer:** Authors will be asked to transfer copyright of the article to the Publisher (or grant the Publisher exclusive publication and dissemination rights). This will ensure the widest possible protection and dissemination of information under copyright laws.

Open Choice articles do not require transfer of copyright as the copyright remains with the author. In opting for open access, the author(s) agree to publish the article under the Creative Commons Attribution License.

**Offprints:** the corresponding author may order offprints.

**Color illustrations:** Online publication of color illustrations is free of charge. For color in the print version, authors will be expected to make a contribution towards the extra costs.

**Proofreading:** The purpose of the proof is to check for typesetting or conversion errors and the completeness and accuracy of the text, tables and figures. Substantial changes in content, e.g., new results, corrected values, title and authorship, are not allowed without the approval of the Editor. After online publication, further changes can only be made in the form of an Erratum, which will be hyperlinked to the article.

**Online First:** The article will be published online after receipt of the corrected proofs. This is the official first publication citable with the DOI. Issue and page numbers may also be used to cite the paper after release of the printed version.

**Pub Med Central**
If your research has been funded by NIH and you want Springer to deposit the author’s accepted version in PubMed Central on your behalf and have it opened up for the public within 12 months, please send an email to nihfunding@springer.com including:
* Your name as corresponding author and your affiliation
* The title of the journal
* The title of the article
* The DOI of the article
* Your NIH grant number

*(Please note, that we can only process requests including the complete grant number. e.g., ’R01 GM012345-03’)*
