Call for papers

*Flexible Services and Manufacturing (FSM) Journal*

The mission of the *Flexible Services and Manufacturing Journal*, formerly known as the *International Journal of Flexible Manufacturing Systems*, is to publish original, high-quality research papers in the field of services and manufacturing management. All aspects in this field including the interface between engineering and management, the design and analysis of service and manufacturing systems as well as operational planning and decision support are covered. The journal seeks papers that have a clear focus on the applicability in the real business world including all kinds of services and manufacturing industries, e.g. in logistics, transportation, health care, manufacturing-based services, production planning and control, and supply chain management. Flexibility should be understood in its widest sense as a system's ability to respond to changes in the environment through improved decision making and business development procedures and enabling IT solutions.

The journal is interdisciplinary in nature considering work from Management Science, Industrial Engineering, Operations Research as well as other disciplines that contribute to the understanding, development and improvement of service and manufacturing systems. It is the aim of the journal to publish papers which are relevant to both researchers and practitioners in the world of services and manufacturing. Topics could include, but are not limited to areas such as the following:

- Operations management in process and manufacturing industries
- Production planning and control
- Monitoring and control of manufacturing systems
- Operations management in service organizations
- Operations strategy and development
- Design of services and manufacturing facilities
- Performance evaluation and productivity analysis of services and manufacturing systems
- Supply chain management
- Logistics, transportation and warehousing
- Intermodal transportation and traffic systems
- Computer-based planning systems
- Health care systems
- Modelling and simulation in services and manufacturing industries
- Manufacturing-based service and service-embedded manufacturing
- Decision making and business development procedures for services and manufacturing
- Reviews and surveys
- Case studies
All papers appearing in the *Flexible Services and Manufacturing Journal* undergo a first editorial screening followed by a rigorous peer review by at least two anonymous referees.

Authors are requested to submit their manuscript online at: http://www.editorialmanager.com/flex/

**Editorial Board (from October 2009)**

*Editor-in-Chief:*

**Hans-Otto Guenther**, TU Berlin, Germany

*Area editors:*

**Ek Peng Chew**, National University of Singapore  
**Chen-Fu Chien**, National Tsing Hua University, Hsinchu, Taiwan  
**Martin Grunow**, Technical University of Denmark  
**Rainer Kolisch**, TU Munich, Germany  
**Marion Rauner**, University of Vienna, Austria

*Editors:*

**Frank Chen**, Chinese University of Hong Kong, China  
**Jian Chen**, Tsinghua University, Beijing, China  
**Mabel Chou**, National University of Singapore  
**Karl F. Doerner**, University of Vienna, Austria  
**Matthias Ehrgott**, University of Auckland, New Zealand  
**Jan C. Fransoo**, TU Eindhoven, The Netherlands  
**Geert-Jan van Houtum**, TU Eindhoven, The Netherlands  
**Kap-Hwan Kim**, Pusan National University, Korea  
**Yeong-Dae Kim**, Korea Advanced Institute of Science and Technology (KAIST), Korea  
**Erhan Kozan**, Queensland University of Technology, Australia  
**Loo Hay Lee**, National University of Singapore  
**Herbert Meyr**, TU Darmstadt, Germany  
**David Pisinger**, Technical University of Denmark  
**Leena Suhl**, University of Paderborn, Germany  
**Chung Piaw Teo**, National University of Singapore
