Topical Collection "Peptide and Protein Analysis"

Dear Colleagues,

CHROMATOGRAPHIA has a long tradition publishing original research as well as review articles in separation sciences. Furthermore, the journal publishes topical collections as separate sections on important and timely analytical topics. Currently, we are planning a topical collection covering all aspects of peptide and protein analysis by separation techniques such as HPLC, UHPLC, capillary electrophoresis or capillary electrochromatography including hyphenation with mass spectrometry.

Manuscripts describing the application of peptides and proteins in analytical sciences, for example, as chiral selectors or in the context of enzyme assays are also welcome.

We would like to invite all interested scientists to contribute to this special issue of CHROMATOGRAPHIA. The article could be either a full research paper or a short communication describing timely and important new developments. Moreover, review articles are welcome, provided that the topic of the review is discussed with us. The deadline of submission is March 31, 2017. The manuscripts will be reviewed according to the policy of the journal.

The manuscript will be published as soon as they are accepted and will be linked online as a topical collection.

Kind regards
Gerhard K. E. Scriba
Debby Mangelings

Please submit your manuscripts electronically at: http://www.editorialmanager.com/chro indicating that it is intended for this collection. Should you have any questions, please do not hesitate to contact us by email.
