24 issues per year  
 ISSN: 0043-5325 (print)  
 ISSN: 1613-7671 (electr.)  
 journal no. 508

**Die Wiener Klinische Wochenschrift – The Middle European Journal of Medicine** is an international peer-reviewed bilingual (German, English) scientific medical journal covering the entire spectrum of clinical medicine and related areas such as ethics in medicine, public health and the history of medicine. In addition to original articles (which are published predominantly in the English language), the Journal contains editorials and leading articles on recent topics, review articles, case reports and a wide spectrum of special articles. Experimental material is considered for publication if it is directly relevant to clinical medicine. International contributors – predominantly from Central Europe – as well as the proportion of English language articles have been steadily increasing. Consequently, the international reputation of the journal (as assessed by the impact factor) has risen during the recent years.

**Wiener Klinische Wochenschrift – The Middle European Journal of Medicine,** the proportion of English language is constantly increasing.
