

Compliance with Ethics Requirements

In order to comply with the Journal's ethical requirements, the following must be included in a separate section entitled "Compliance with Ethics Requirements" just before the reference list. The editors reserve the right to reject manuscripts that do not comply with the below-mentioned requirements. The author will be held responsible for false statements or failure to fulfill the below-mentioned requirements.

Conflict of Interest:

Authors must indicate whether or not they have a financial relationship with the organization that sponsored the research. The Conflict of Interest statements must list each author separately by name:

John Smith declares that he has no conflict of interest.

Paula Taylor has received research grants from Drug Company A.

Mike Schultz has received a speaker honorarium from Drug Company B and owns stock in Drug Company C.

For studies with human subjects include the following:

All procedures followed were in accordance with the ethical standards of the responsible committee on human experimentation (institutional and national) and with the Helsinki Declaration of 1975, as revised in 2000 (5). Informed consent was obtained from all patients for being included in the study.

If the research was not conducted in accordance with the Helsinki Declaration, the authors must explain the rationale for their approach, and demonstrate that the institutional review body explicitly approved the doubtful aspects of the study.

If any identifying information about patients is included in the article, the following sentence must also be included:

Additional informed consent was obtained from all patients for which identifying information is included in this article.

For studies with animals include the following sentence:

All institutional and national guidelines for the care and use of laboratory animals were followed.

For articles that do not contain studies with human or animal subjects:

We recommend including the following sentence to make sure that readers are aware that there are no ethical issues with human or animal subjects:

This article does not contain any studies with human or animal subjects.
