

Editorial Note

It has been brought to the attention of the journal *Climatic Change* and *Climatic Change Letters* that some readers may interpret the publication of certain Chinese maps referenced in the journal as a political statement. This is not the case. The journals submission policy is clearly expressed in the authors, copyright transfer statements where authors warrant sole ownership of their paper, confirm that they have been authorized by any additional copyright owner to assign the right to publish the work, and assert that the article does not infringe any third party rights. Works published, therefore, reflect the individual views of the authors and are not the official point of view of the Editors-in-Chief, its Editorial Board or the Publisher. The journal neither has a position with regard to any jurisdictional claims in the area of water that might be inferred from the maps, nor does the journal have any vested interest in the details of the jurisdictional boundaries depicted. The published scientific results are the critical concern to the readers of the journal.
