Call for Papers – Special Issue of *Journal of Experimental Criminology*

*The intersection of criminology and public health: Experimental tests of interventions to reduce violence, injury and harm*

Guest Editors
John MacDonald, University of Pennsylvania
Charles Branas, University of Pennsylvania

The *Journal of Experimental Criminology* seeks submissions for a special issue focusing on public health interventions that aim to reduce violence, injury and harm. Submissions can be up to 4,000 words in length and will be subject to the journal’s usual blinded peer review process.

**Scope**
- public health interventions
- broad definition of outcomes including crime reduction, violence reduction, injury prevention, safety promotion, harm reduction, stress and fear reduction
- focus on population or community randomized trials, laboratory and simulation trials under controlled conditions, and/or randomized trials that focus on interventions that alter public places to reduce violence
- experiments, quasi-experiments, systematic reviews, methodology around systematic reviews/experiments in public health domain

**Submissions due:** April 1, 2017

**About the Editors**
John MacDonald is a Professor of Criminology and Sociology and Director of the Fels Institute of Government, University of Pennsylvania. His research focuses primarily on the study of crime and violence, race and ethnic disparities in criminal justice, and the effect of public policy responses on crime. In 2012 he received the David N. Kershaw Award from the Association for Public Policy Analysis and Management.

Charles Branas is a Professor of Epidemiology, University of Pennsylvania. He works to improve health and healthcare and is recognized for his efforts to reduce violence and enhance emergency care. Much of his work incorporates human geography and place-based change. Professor Branas has served on boards and offered scientific expertise for numerous groups including the National Institutes of Health, the Centers for Disease Control, the Canadian National Research Council, the South African Medical Research Council, the Institute of Medicine, the National Research Council, and the American Public Health Association.

The *Journal of Experimental Criminology* focuses on high quality experimental and quasi-experimental research in the development of evidence-based crime and justice policy. The journal is committed to the advancement of the science of systematic reviews and experimental methods in criminology and criminal justice, and publishes empirical papers, reviews of substantive criminal justice problems, and methodological papers on experimentation and systematic review. Coverage ranges across the broad array of scientific disciplines that are concerned with crime and justice problems.

Information on how to submit articles can be found on the journal’s website at [http://www.springer.com/social+sciences/criminology/journal/11292](http://www.springer.com/social+sciences/criminology/journal/11292)
