**SPECIAL ISSUE ON**

**Key Problems in Long-Distance Learning and Training**

**Overview:**

As the world of technology offers a rapidly increasing number of outlets for creativity and communications, a worldwide education is undergoing a significant renovation. Each day more classrooms can be accessed from anywhere, at any time. So it is the time to aim at exploring e-learning solutions that spark the attention as well as imagination of students through interactivity, immersion, variety of content, or cutting-edge technologies. Moreover, papers of solution of network service, QoS, organization and structure in e-learning and e-education are encouraged, such as long distance signal transmission and cloud and fog computing in e-learning.

**Topics**

Topics of interest include, but are not limited to, the following scope:

<ul style="list-style-type: none"><li>• Accessibility and usability of web-based instruction</li><li>• Assessment</li><li>• Augmented reality solutions</li><li>• Collaborative learning and social networks</li><li>• High-impact practices in e-learning</li><li>• Informal e-Learning solutions</li><li>• Learning analytics</li><li>• Massive Open Online Course</li><li>• Mobile learning</li><li>• Security and privacy in education and e-learning systems</li></ul>	<ul style="list-style-type: none"><li>• Best Practices</li><li>• Big Data in e-learning</li><li>• Blended learning</li><li>• Cloud and fog computing in e-learning</li><li>• Social and organizational perspectives</li><li>• Student engagement</li><li>• e-Educational Models, Frameworks and Platforms</li><li>• Virtual Learning Environments</li><li>• QoS of e-learning</li></ul>
