Physics in Perspective
Volumes 1-15 (1999-2013) Index

Editorials

Rigden, John S. and Roger H. Stuewer: Physics in Perspective................................................................. 1, 1
Rigden, John S. and Roger H. Stuewer: A Ticket to Science Sights............................................................ 1, 121
Rigden, John S. and Roger H. Stuewer: The Conservative Character of Science...................................... 1, 229
Rigden, John S. and Roger H. Stuewer: From Outward and Inward to Where?...................................... 1, 343
Rigden, John S. and Roger H. Stuewer: Is Humor Missing in Physics?....................................................... 2, 1
Rigden, John S. and Roger H. Stuewer: Copenhagen.................................................................................. 2, 115
Rigden, John S. and Roger H. Stuewer: The Vitality of Youth Energizes Physics......................................... 2, 221
Rigden, John S. and Roger H. Stuewer: The Quantum At Its Centenary.................................................... 2, 333
Rigden, John S. and Roger H. Stuewer: Good Theories Make For Good Experiments............................. 3, 1
Rigden, John S. and Roger H. Stuewer: “With these dark words begins my tale”...................................... 3, 133
Rigden, John S. and Roger H. Stuewer: Celebrate Facts.............................................................................. 3, 255
Rigden, John S. and Roger H. Stuewer: Physics in a New Era................................................................. 3, 377
Rigden, John S. and Roger H. Stuewer: Realism and the Contraction of “Pure” Physics.......................... 4, 1
Rigden, John S. and Roger H. Stuewer: Are Talks By Physicists Weakened By Their Props?.................. 4, 125
Rigden, John S. and Roger H. Stuewer: The Lure of a Simple Story.......................................................... 4, 125
Rigden, John S. and Roger H. Stuewer: Victor Frederick Weisskopf, September 19, 1908-April 21, 2002....................................................................................................................... 4, 251
Rigden, John S. and Roger H. Stuewer: Physics in Crisis?.......................................................................... 4, 367
Rigden, John S. and Roger H. Stuewer: Stop the Physics Centrifuge.......................................................... 5, 1
Rigden, John S. and Roger H. Stuewer: Globalization of Nuclear Weapons?............................................. 5, 127
Rigden, John S. and Roger H. Stuewer: Two Twin Paradoaxes................................................................. 5, 241
Rigden, John S. and Roger H. Stuewer: Faith, Reason, and Physics in Perspective..................................... 5, 357
Rigden, John S. and Roger H. Stuewer: Is Physics Simple? Yes and No..................................................... 6, 1
Rigden, John S. and Roger H. Stuewer: Ideology and Science; Science and Ideology.............................. 6, 249
Rigden, John S. and Roger H. Stuewer: “Lest We Forget...”...................................................................... 7, 135
Rigden, John S. and Roger H. Stuewer: Faith of Our Fathers..................................................................... 7, 265
Rigden, John S. and Roger H. Stuewer: Do Physicists Understand Physics?............................................. 7, 387
Rigden, John S. and Roger H. Stuewer: Physics in Perspective: New Features to Begin the Eighth Year........... 8, 1
Rigden, John S. and Roger H. Stuewer: PSSC Physics, Eisenhower, and Today, 50 Years Later............. 8, 113
Rigden, John S. and Roger H. Stuewer: Remember the Basics............................................................... 8, 233
Rigden, John S. and Roger H. Stuewer: The Meek Weak........................................................................... 8, 357
Rigden, John S. and Roger H. Stuewer: FAPP.......................................................................................... 9, 1
Rigden, John S. and Roger H. Stuewer: Will the U.S. Lead or Follow?...................................................... 9, 127
Rigden, John S. and Roger H. Stuewer: Does Nature Hide Its Cosmic Face?.......................................... 9, 263
Rigden, John S. and Roger H. Stuewer: Physicists: Head and Heart....................................................... 9, 387
Rigden, John S. and Roger H. Stuewer: Gates to Heaven, Gates to Hell.................................................... 10, 1
Rigden, John S. and Roger H. Stuewer: Will Economics End the Physics that Captivates the Public?.... 10, 135
Rigden, John S. and Roger H. Stuewer: Too Much, Too Much................................................................. 10, 255
Rigden, John S. and Roger H. Stuewer: Public Intellectuals Needed.......................................................... 10, 377
Rigden, John S. and Roger H. Stuewer: Will It Be a Bang or a Whimper?.................................................. 11, 1
Rigden, John S. and Roger H. Stuewer: Where Are the Fundamental Problems?..................................... 11, 117
Rigden, John S. and Roger H. Stuewer: The SSC and the Hubble: A Predictable Lesson for Physicists........ 11, 241
Rigden, John S. and Roger H. Stuewer: Is the Romance with Formalism Hurting Physics?...................... 11, 355
Rigden, John S. and Roger H. Stuewer: Physicists Can Calibrate Themselves........................................... 12, 1
Rigden, John S. and Roger H. Stuewer: Are Talks By Physicists Weakened By Their Props?....................... 12, 119
Rigden, John S. and Roger H. Stuewer: Has the Media Forgotten Physics?.............................................. 12, 245
Rigden, John S. and Roger H. Stuewer: Can the Humanities Help Science?.......................................... 12, 369
Rigden, John S. and Roger H. Stuewer: Constancy Directs Change.......................................................... 13, 1

Crease, Robert P. and Vladimir Shiltsev: Pomor Polymath: The Upbringing of Mikhail Vasilyevich Lomonosov, 1711-1730

Crepeau, John: Loschmidt, Stefan, and Stigler’s Law of Eponymy
Crowe, Michael J.: Pierre Duhem, the History and Philosophy of Physics, and the Teaching of Physics................................................................. 1, 54
D’Agostino, Salvo: From Rational Numbers to Dirac’s Bra and Ket: Symbolic Representation of Physical Laws......................................................... 4, 216
D’Agostino, Salvo: On the Difficulties of the Transition from Maxwell’s and Hertz’s Pure-Field Theories to Lorentz’s Electron.................................................. 2, 398
D’Agostino, Salvo: The Bild Conception of Physical Theory: Helmholtz, Hertz, and Schrödinger............................ 6, 372
Dahmen, Silvio R.: Boltzmann and the Art of Flying......................................................................................................................... 11, 244
Dongen, Jeroen van: Mistaken Identity and Mirror Images: Albert and Carl Einstein, Leiden and Berlin, Relativity and Revolution.................................................................. 14, 126
Dongen, Jeroen van: Reactionaries and Einstein’s Fame: “German Scientists for the Preservation of Pure Science,” Relativity, and the Bad Nauheim Meeting .................................................. 9, 212
Drago, Giorgio and Salvatore Esposito: Ettore Majorana’s Course on Theoretical Physics: A Recent Discovery................................................................. 9, 329
Dragoni, Giorgio, Giulio Maltese, and Luisa Atti: Quirino Majorana’s Experiments on the Speed of Light and Gravitational Absorption ......................................................................................... 9, 281
Durham, Ian T.: Eddington and Uncertainty .............................................................................................................................................. 5, 398
Eckert, Michael: Mathematics, Experiments, and Theoretical Physics: The Early Days of the Sommerfeld School........................................................................ 1, 238
Essen, Ray: Louis Essen and the Velocity of Light: From Wartime Radar to Unit of Length.......................................................... 12, 51
Ferris, Timothy: On Science Writing...................................................................................................................................................... 4, 3
Fitas, Augusto José dos Santos and António Augusto Passos Videira: Guido Beck, Alexandre Proca, and the Oporto Theoretical Physics Seminar .................................................................................. 9, 4
Franklin, Allan: Are the Laws of Physics Inevitable?.................................................................................................................. 10, 182
Franklin, Allan: The Roles of Experiment................................................................................................................................................... 1, 35
Franklin, Allan: William Wilson and the Absorption of Beta Rays................................................................................................. 4, 40
French, A.P: The Strange Case of Emil Rupp......................................................................................................................... 1, 3
Frercks, Jan: Fizeau’s Research Program on Ether Drag: A Long Quest for a Publishable Experiment............... 7, 35
Friedrich, Bretislav: The KLMN of X-Ray Spectroscopy: Dolejšek’s Discovery of the N Series................................. 1, 384
Gambassi, Andrea: Enrico Fermi in Pisa............................................................................................................................................. 5, 384
Gavroglu, Kostas: From Defiant Youth to Conformist Adulthood: The Sad Story of Liquid Helium.............. 3, 165
Gearhart, Clayton A.: Planck, the Quantum, and the Historians .................................................................................. 4, 170
Gerward, Leif: Paul Villard and his Discovery of Gamma Rays .............................................................................................................. 1, 367
Gingras, Yves: The Transformation of Physics from 1900 to 1945.......................................................................................... 12, 248
Goenner, Hubert: Albert Einstein and Fredrich Dessauer: Political Views and Political Practice .............. 5, 21
Goodstein, David and Judith Goodstein: Richard Feynman and the History of Superconductivity.................. 2, 30
Goodstein, Judith R.: A Conversation with Hans Bethe................................................................................................. 1, 253
Goodstein, Judith R.: A Conversation with Franco Rasetti.......................................................................................... 3, 271
Goodstein, Judith R.: A Conversation with Lee Alvin DuBridge—Part II.................................................................................. 5, 281
Goodstein, Judith R.: A Conversation with Frank Press.................................................. 6, 184
Gorelik, Gennady: The Paternity of the H-Bombs: Soviet-American Perspectives ................................................. 11, 169
Graney, Christopher M.: But Still, It Moves: Tides, Stellar Parallax, and Galileo’s Commitment to the Copernican Theory.............................................................................. 10, 258
Graney, Christopher M.: Contra Galileo: Riccioli’s “Coriolis-Force” Argument on the Earth’s Diurnal Rotation.................................................................................. 13, 387
Graney, Christopher M.: Seeds of a Typhonic Revolution: Telescopic Observations of the Stars by Galileo Galilei and Simon Marius .................................................................................. 12, 4
Grasso, Giacomo, Carlo Oppici, Federico Rocchi, and Marco Sumini: A Neutronics Study of the 1945 Haigerloch B-VIII Nuclear Reactor.................................................................................. 11, 318
Greenberg, John: A Conversation with William A. Fowler—Part II.................................................................................. 7, 165
Guerra, Francesco, Matteo Leone, and Nadia Robotti: Enrico Fermi’s Discovery
of Neutron-Induced Artificial Radioactivity: Neutrons and Neutron Sources ........................................ 8, 255
Guerra, Francesco, Matteo Leone, and Nadia Robotti: The Discovery of Artificial Radioactivity.................. 14, 33
Guerra, Francesco and Nadia Robotti: Enrico Fermi’s Discovery of Neutron-Induced Artificial Radioactivity: The Influence of His Theory of Beta Decay ......................................................... 11, 379
Guerra, Francesco and Nadia Robotti: Ettore Majorana’s Forgotten Publication on the Thomas-Fermi Model ......................................................................................................................... 10, 56
Guerra, Francesco and Nadia Robotti: The Disappearance and Death of Ettore Majorana................................ 15, 160
Halpern, Paul: Klein, Einstein, and Five-Dimensional Unification ................................................................. 9, 390
Halpern, Paul: Nordström, Ehrenfest, and the Role of Dimensionality in Physics ......................................... 6, 390
Halpern, Paul: Peter Bergmann: The Education of a Physicist ................................................................. 7, 390
Halpern, Paul: Quantum Humor: The Playful Side of Physics at Bohr’s Institute for Theoretical Physics.......... 14, 279
Harrison, Walter A.: Finding the Energy Bands of Silicon .............................................................................. 11, 198
Haussecker, Enzo F. and Alexander W. Chao: The Influence of Accelerator Science on Physics Research........... 13, 146
Heering, Peter: Regular Twists: Replicating Coulomb’s wire-Torsion Experiments......................................... 8, 52
Hentschel, Klaus: The Culture of Visual Representations in Spectroscopic Education and Laboratory Instruction ...................................................................................................................... 1, 282
Hentschel, Klaus and Gerhard Rammer: Physicists at the University of Göttingen, 1945-1955....................... 3, 189
