WHO – Know Your Audience

- Create a textbook in pure or applied mathematics accessible to graduate students, whether in a course or for self-study.
- UTX is essentially a graduate textbook series but you can be flexible: early chapters and appendices may also be useful to undergraduates and could even serve as the basis of an undergraduate course. Later chapters of a book may lead up to research level or target PhD students.
- Maintain an appropriate style and pace for your target audience throughout the book. Students rarely complain that the pace is too gentle.

WHAT – Content of the Book

- Avoid falling into the Theorem-Proof-Theorem-Proof trap—include prose about what is being proved and why, and connecting prose between results.
- Be clear about the prerequisites.
- Interesting, nontrivial examples help readers and motivate definitions and theorems.
- Add references to the literature whenever possible.
- Challenge your readers with thoughtful exercises.
- Think about the size of your work: many students find more than 500 pages intimidating.
- Make sure your English is polished and correct. Decide for either British or American English.

WHERE – UTX is a Global Graduate Textbook Series

- UTX has no geographical restrictions. It can contain books based on European Masters courses (i.e. the two-year-long second cycle of the “Bologna model”), North American or Australian graduate courses, “Taught Courses” for beginning PhD-students in the UK, etc.

WHY – Why Readers Should Care About This Book

- Explain why we should care about this subject, and how your book will benefit the reader.
- Use a unique, classroom-tested approach that differs from other books on the subject.
- Research the existing literature on the subject and ask yourself what is new or unique to your book.

HOW – Submit Your Proposal

- Submissions should include several chapters or a nearly completed draft manuscript as well as a table of contents and preface or a proposal form (available from your Springer editor).
- Prospective authors based in the Americas should contact Dr. Loretta Bartolini in New York (email: loretta.bartolini@springer.com).
- Prospective authors outside of the Americas should contact Dr. Rémi Lodh in London (email: remi.lodh@springer.com).
- GTM, TAM or UTX? We will help you finding the right series for your book.
- For more information visit our Book Author Homepage: http://www.springer.com/authors/book+authors.
