

Writing for Springer's

Series on Touch and Haptic Systems

Series Editors:

Manuel Ferre
Marc Ernst
Alan Wing

About this Series:

The Springer Series on Touch and Haptic Systems is published in collaboration with the EuroHaptics Society. It is focused on publishing new advances and developments in all aspects of haptics.

Haptics is a multi-disciplinary field with researchers from Psychology, Physiology, Neurology, Engineering, and Computer Science (amongst others) contributing to a better understanding of the sense of touch, and researching into how to improve and reproduce haptic interaction artificially in order to simulate real scenarios.

The series includes monographs focused on specific topics, edited volumes covering general topics from different perspectives, and selected PhD theses. Books in this series focus on haptics or haptic interfaces including:

- Neuroscience
- Haptic Rendering
- Medical & Rehabilitation Applications
- Collaborative Haptics
- Tactile Display & Tactiles
- Haptic HCI (Interaction, Visualization).
- Perception & Psychophysics
- Devices and Technology
- Art & Design Applications
- Multimodal Interaction
- Sensing

Submitting a Book Proposal:

The Series has currently published twelve volumes covering topics such as haptic perception, reproduction of touch, haptic devices, multimodal interaction ect. An updated list of publications can be found at: <http://www.springer.com/series/8786?detailsPage=titles>

Researchers are invited to publish their work in haptics in order to grow the discipline within the community. The book proposal will be reviewed by experts in two stages. In the first stage, the book proposal (monographs and edited volumes) will have to include an outline stating the relevance of the book for the haptics field, a detailed table of contents and a minimum of two chapters, the material submitted can be provisional at this stage, this revision will be completed within one month. In the second stage, the final revision will be carried out in order to comply with the Springer book series.

To submit a proposal, please email Manuel Ferre m.ferre@upm.es one of the Series Editors, or Helen Desmond helen.desmond@springer.com from Springer.

There will be a presentation about the series at the EuroHaptics Conference 2016, which will be held in London on 4th-7th July.
