

## Call for Papers / New Journal Announcement

### Journal of Cryptographic Engineering

4 issues/year

ISSN 2190-8508 / e-ISSN 2190-8516

#### Aims & Scope

The Journal of Cryptographic Engineering is an archival journal publishing high-quality scientific articles presenting methods, techniques, tools, implementations, and applications of research in cryptographic engineering, including cryptographic hardware, cryptographic embedded systems, and embedded security. JCEN aims to serve the academic and corporate R&D community interested in cryptographic hardware and embedded security by offering a fo-

cus-ed journal drawing together archival papers that are presently scattered across various journals.

The Journal of Cryptographic Engineering will cover the research areas summarized below.

#### Cryptographic Hardware:

Hardware architectures for public-key cryptography and secret-key cryptography; special-purpose hardware for cryptanalysis; cryptographic processors and co-processors; hardware accelerators for security protocols (security processors, network processors, etc.); true and pseudorandom number generators; Physically Unclonable Functions (PUFs).

#### Cryptographic Software for Embedded Systems:

Efficient software implementations of cryptography for embedded processors; efficient and secure implementations of cryptography using multiprocessor cores; cryptographic libraries; cryptographic algorithms targeting embedded devices.

#### Attacks Against Implementations and Countermeasures Against These Attacks:

Side channel attacks and countermeasures; faults and fault models for cryptographic devices; fault attacks and countermeasures; hardware tamper resistance; Trojan hardware.

#### Tools and Methodologies:

Computer aided cryptographic engineering; methodologies and environments for fair comparison of hardware and software efficiency of cryptographic algorithms, architectures, and implementations; partial and run-time reconfiguration of cryptographic systems; reliability and fault tolerance in cryptography and cryptanalysis; architectures for trusted computing.

#### Applications and Implementation Environments:

Cryptography in wireless applications (mobile phone, WLANs, etc.); cryptography for pervasive computing (RFID, sensor networks, etc.); FPGA design security; hardware IP protection and anti-counterfeiting techniques; reconfigurable hardware for cryptography; smart card processors, systems, and applications; security in commercial consumer applications (pay-TV, automotive, etc.); secure storage devices (memories, disks, etc.); technologies and hardware for content protection; security for embedded software and systems.

Call for Papers / New Journal Announcement

## Journal of Cryptographic Engineering

4 issues/year – ISSN 2190-8508 / e-ISSN 2190-8516

### Editor-in-Chief

Çetin Kaya Koç,  
University of California Santa Barbara, USA

### Steering Committee

Çetin Kaya Koç, University of California Santa Barbara, USA

Christof Paar, Ruhr University of Bochum, Germany

Jean-Jacques Quisquater, Université Catholique de Louvain, Belgium

Ingrid Verbauwhede, Katholieke Universiteit Leuven, Belgium

### Associate Editors

Paulo S.L. Barreto, University of Sao Paulo, Brazil  
pbarreto@larc.usp.br

Lejla Batina, Radboud University Nijmegen, The Netherlands  
Lejla.Batina@esat.kuleuven.be

Dan Bernstein, University of Illinois at Chicago, USA  
djb@cr.yp.to

Guido Marco Bertoni, ST Microelectronics, Italy  
Guido.bertoni@st.com

Joan Daemen, ST Microelectronics, Belgium  
Joan.daemen@st.com

Ricardo Dahab, University of Campinas, Brazil  
rdahab@ic.unicamp.br

Jean-Luc Danger, Télécom ParisTech, France  
jean-luc.danger@telecom-paristech.fr

Thomas Eisenbarth, Worcester Polytechnic Institute, USA  
teisenbarth@wpi.edu

Pierre-Alain Fouque, Université de Rennes 1, France  
pierre.alain.fouque@ens.fr

Krzysztof Gaj, George Mason University, USA, kgaj@gmu.edu

Tim Güneysu, Ruhr University of Bochum, Germany  
gueneysu@crypto.rub.de

Anwar Hasan, University of Waterloo, Canada  
A.Hasan@ece.uwaterloo.ca

Naofumi Homma, Tohoku University, Japan  
naofumi.homma.c8@tohoku.ac.jp

Marc Joye, Technicolor, France, Marc.Joye@technicolor.com

Tanja Lange, Technische Universiteit Eindhoven,  
The Netherlands, tanja@hyperelliptic.org

Roel Maes, Intrinsic-ID, The Netherlands
