Instructions for authors

of published procedures should be mentioned briefly. Subheadings should be used.

Results should be presented with clarity and precision. The results should be written in the past tense when describing findings in the author's experiments. Previously published findings should be written in the present tense. Results should be explained, but largely without referring to the literature.

The Discussion should be confined to interpretation of the results (without repetition), also in light of the pertinent literature on the subject. When appropriate, the Results and Discussion sections can be combined.

Acknowledgements should be presented after the Discussion section. Personal acknowledgements should only be made with the permission of the person(s) named.

References. The list of references should include only works that are cited in the text and that have been published or accepted for publication. Unpublished work in preparation, Ph.D. and Masters theses, etc., should be mentioned in the text only, in parentheses. Citations in the text should be by numbers in square brackets referring to an alphabetized list at the end of the paper. References should be in the following style:

Citation of articles that have appeared in electronic journals is allowed if access to them is unlimited and their URL is supplied.

3 Further information

Abbreviations and units. Abbreviations and symbols should follow the recommendations of the IUPAC-IUB Commission. Information can be obtained at http://www.chem.qmw.ac.uk/iupac/. Common abbreviations such as cDNA, NADH and PCR need not to be defined. Non-standard abbreviations should be defined at first mention in the Abstract and again in the main body of the text and used consistently thereafter. SI units should be used throughout.

Nomenclature of organisms. Genus and species names must be in italics. Each genus should be written out in full in the title and at first mention in the text. Thereafter, the genus may be abbreviated, provided there is no danger of confusion with other genera discussed in the paper. Spelling should follow the instructions to authors of the International Journal of Systematic and Evolutionary Microbiology. Nomenclature of protists should follow the Handbooks of Protoctista (Jones and Bartlett, Boston).
