Springer Science+Business Media, Inc. now offers authors, editors and reviewers of *Digestive Diseases and Sciences* the use of our fully web-enabled **online manuscript submission** and review system. To keep the review time as short as possible, we request authors to submit manuscripts online to the journals editorial office. Our online manuscript submission and review system offers authors the option to track the progress of the review process of manuscripts in real time. Manuscripts should be submitted to: [http://ddas.edmgr.com](http://ddas.edmgr.com)

The online manuscript submission and review system for *Digestive Diseases and Sciences* offers easy and straightforward log-in and submission procedures. This system supports a wide range of submission file formats: for manuscripts — Word, WordPerfect, RTF, TXT and LaTeX; for figures — TIFF, GIF, JPEG, EPS, PPT, and Postscript. **PDF is not an acceptable file format.**

**NOTE:** In case you encounter any difficulties while submitting your manuscript online, please get in touch with the responsible Editorial Assistant by clicking on CONTACT US from the tool bar.

**Complete this checklist**

- The typescript, if original article, is arranged as follows: abstract, key words, introduction, methods, results, discussion, references, tables, figure legends, figures.
- The title page includes title of article, name(s) of author(s) and highest academic degree(s), department and institution from which the work originated, acknowledgment of support or sponsorship, postal address for proofs and reprint requests, e-mail address, and suggested running head (not exceeding 40 characters, including spaces). Personal acknowledgments, if any, are given in a separate section at the end of the article. Proofs will be e-mailed as PDF attachments.
- An abstract of 150 words or less states concisely the purpose, results, and conclusions of the study described in the manuscript. Abbreviations, footnotes, and references are not used in the abstract. Do not include abstracts in case reports.
- A list of 4–6 key words is provided directly below the abstract. Key words should express the precise content of the manuscript, as they are used for indexing purposes and should preferably be terms from the *Index Medicus* Medical Subject Headings (MeSH) list. Original articles, including case reports, require key words.
- References are cited in the text by numerals enclosed in parentheses. The references section is typed doublespaced on sheets separate from the text and is numbered consecutively in the order in which references are cited in text. Included are last names and initials of *all* authors, title of article, name of publication, volume, inclusive pages, and year published. Abbreviations conform to those used in *Index Medicus*. The style and punctuation of the references conform to the following examples:

*Journal Article:*
Author Instructions Digestive Diseases and Sciences

Book:

Contribution to a Book:

• A list of three potential reviewers including their mailing addresses and telephone and fax numbers is included.
• Tables are typed double–spaced on separate sheets, with the table number and table title centered above the table and explanatory notes below the table.
• The figure title and caption material appear in the legend and not on the figure. Legends are typed double–spaced on sheets separate from the text. Figures are numbered in one consecutive series in the order in which they are cited in the text. Sufficient information is included in the legends to interpret the figures without reference to the text.
• Three complete sets of unmounted illustrations are submitted. Reproductions are clear, with sharp contrast, especially where fine lines such as those of grids or traces are to be retained. Illustrations are no larger than 8½ × 11 inch, but preferably of a size not needing enlargement or reduction. If color illustrations are submitted, three sets of glossy prints accompany the manuscript. (Prints are preferred to slides as they are a more reliable guide to the final quality of reproduction.) If color illustrations are submitted, cover letter states that the author will bear the cost of color reproduction in print. (Reproduction of color illustrations in the electronic version is complimentary.) Color illustrations may be submitted with the authors cover letter requesting color reproduction in the electronic version, but black–and–white reproduction in the print version, all at no charge.
• Investigations Involving Human Subjects: The journal requires that investigations performed in the United States on human subjects have the prior approval of the appropriate institutional committee on human experimentation. Authors are required to submit a signed statement as to the date and details of the appropriate review. In countries where such mechanisms for approval do not exist, authors are required to submit a signed declaration that the research was carried out in accordance with the Helsinki Declaration. A similar assurance is required to document that animal experimentation was performed under appropriate circumstances.

Submission of a manuscript to DIGESTIVE DISEASES AND SCIENCES is a representation that the manuscript has not been published previously in any form, including symposia and proceedings of meeting, except in brief abstract form, and is not currently under consideration for publication elsewhere. A statement transferring copyright from the authors (or their employers, if they hold the copyright) to Springer Science+Business Media, Inc. will be required before the manuscript can be accepted for publication. Such a written transfer, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the U.S. Copyright Law in order for the publisher to carry through the dissemination of research results and reviews as widely and effectively as possible.

Springer Open Choice. In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer now provides an alternative publishing option: Springer Open Choice. A Springer Open Choice article receives all the benefits of a regular subscription–based article, but in

addition is made available publicly through Springer's online platform SpringerLink. To publish via Springer Open Choice, upon acceptance please visit www.springeronline.com/openchoice to complete the relevant order form and provide the required payment information. Payment must be received in full before publication or articles will publish as regular subscription–model articles. We regret that Springer Open Choice cannot be ordered for published articles.
