M.C. Brodsky  
**Pediatric Neuro-Ophthalmology**

- The only comprehensive textbook in the area of pediatric neuro-ophthalmology
- Provides complete coverage for both the expert and those in training
- New edition includes new neuroimaging figures and updates on recent genetic and molecular mechanisms of disease
- Written for ophthalmologists, neurologists, pediatricians, neuro-ophthalmologists, pediatric neurologists, and pediatric neuroradiologists

*Pediatric Neuro-Ophthalmology, 3rd edition* provides the single authoritative resource on the pathophysiology, diagnostic evaluation, and treatment of neuro-ophthalmologic disorders in children. This book is encyclopedic in scope, incorporating extensive references for each condition, numerous diagrams and pictures, and a detailed analysis of the clinical disorders included in the differential diagnosis of each condition. The third edition builds upon this format to incorporate new discoveries about mechanisms of disease, new diagnostic modalities, advances in treatment in the field of pediatric neuro-ophthalmology, and updated neuroimaging figures.
