R. Pereira (Ed.)

Financing Basic Income

Addressing the Cost Objection

Series: Exploring the Basic Income Guarantee

- Tackles the most contentious issue of universal basic income
- Identifies overlooked revenue sources
- Demonstrates how BIG can address poverty's costs to society

This Palgrave Pivot argues that basic income at a decent level is, in fact, affordable. The contributors approach the topic from the perspectives of three different countries—Canada, Switzerland, and Australia—to overcome objections that a universal program to keep all citizens above the poverty line would be too expensive to implement. They assess the complex array of revenue sources that can make universal basic income feasible, from the underestimated value of public program redundancies to new and so far unaccounted publicly owned assets.
