L. Prados de la Escosura

**Spanish Economic Growth, 1850–2015**

Series: Palgrave Studies in Economic History

- Sheds a definitive light on the long run economic performance of Spain to date
- Constructs estimates for production, private and public consumption, and sectoral output for Spain
- Critically discusses existing estimates and compares with other European economics

This book is open access under a CC BY 4.0 license.

This text offers a comprehensive and nuanced view of the economic development of Spain since 1850. It provides a new set of historical GDP estimates for Spain from the demand and supply sides, and presents a reconstruction of production and expenditure series for the century prior to the introduction of modern national accounts. The author splices available national accounts sets over the period 1958–2015 through interpolation, as an alternative to conventional retropolation. The resulting national accounts series are linked to the historical estimates providing yearly series for GDP and its components since 1850. On the basis of new population estimates, the author derives GDP per head, decomposed into labour productivity and the amount of work per person, and placed into international perspective.

With theoretical reasoning and historiographical implications, Prados de la Escosura provides a useful methodological reference work for anyone interested in national accounting.

‘This book stands among the classics for the Kuznetian paradigm in empirical economics. This is the definitive study of Spain’s transition to a modern economy.’

—Patrick Karl O’Brien, Emeritus Fellow at St. Antony’s College, the University of Oxford, UK, and Professor Emeritus of Global Economic History at the London School of Economics and Political Science, UK

‘The definitive account of Spanish economic growth since 1850, based firmly on a magisterial reconstruction of that country’s national accounts and an unrivalled knowledge of both Spanish and global economic history of the period.’

—Stephen Broadberry, Professor of Economic History at Nuffield College, the University of Oxford, UK
