International Microbiology
Official Journal of the Spanish Society for Microbiology
Editor-in-Chief: J. Berenguer

- Publishes information on basic and applied microbiology for a worldwide readership
- Includes articles about microbiologists and their work
- Coverage is broadened to include eukaryotic microorganisms
- Official Journal of the Spanish Society for Microbiology

International Microbiology publishes information on basic and applied microbiology for a worldwide readership. The journal publishes articles and short reviews based on original research, articles about microbiologists and their work and questions related to the history and sociology of this science. Also offered are perspectives, opinion, book reviews and editorials.

A distinguishing feature of International Microbiology is its broadening of the term microbiology to include eukaryotic microorganisms.

Coverage extends to such topics as microorganisms (viruses, prokaryotes, protists, moulds, yeast); microbial biology (taxonomy, genetics, morphology, physiology, ecology, pathogenesis); microbial applications (environmental, soil, industrial, food and medical microbiology, biodeterioration, bioremediation, biotechnology) and the state of microbiology in different regions of the world.

This is the official journal of the Spanish Society for Microbiology.
