Population Ecology

Chief Editor: T. Noda

- ▶ Presents papers on population ecology, from the individual to community level
- ▶ Covers population dynamics and distribution, evolutionary ecology, ecological genetics, and more
- ▶ Publishes Special Features, which are periodic collections of research articles focusing on specific research topics
- ▶ Official journal of the Society of Population Ecology
- ▶ 100% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Population Ecology publishes refereed original research articles and reviews on various aspects of population ecology, from the individual to the community level. Coverage includes population dynamics and distribution, evolutionary ecology, ecological genetics, theoretical models, conservation biology, agroecosystem studies, and bioresource management. Notes and Comments articles (limited to 6 pages in print) offer brief items on both empirical and theoretical investigations, as well as comments on previously published papers. New concepts, analyses, and data are discussed in Forum articles. Special Features, collections of research articles and reviews organized by the editors, are published periodically and focus on specific research topics.

The Chief Editor is Dr. Takashi Noda, Hokkaido University, Sapporo, Japan.

Impact Factor: 1.865 (2016), Journal Citation Reports®
