Apoptosis
An International Journal on Programmed Cell Death
Editor-in-Chief: A.W. Griffioen; P. Nowak-Sliwinska

- Stimulates research on the basis of mechanisms of apoptosis and on its role in various human disease processes
- Investigates links to cancer, autoimmune disease, viral infection, AIDS, cardiovascular disease, neurodegenerative disorders, osteoporosis and ageing
- Encourages development of clinical therapies against apoptosis-related diseases
- 90% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Apoptosis is an international peer-reviewed journal devoted to the rapid publication of innovative basic and clinically-oriented investigations into programmed cell death. It aims to stimulate research on the basis of mechanisms of apoptosis and on its role in various human disease processes including: cancer, autoimmune disease, viral infection, AIDS, cardiovascular disease, neurodegenerative disorders, osteoporosis and ageing. The editors intend to encourage the development of clinical therapies against apoptosis-related diseases.

Impact Factor: 3.833 (2016), Journal Citation Reports®
