Biomedical Engineering
Editor-in-Chief: S.V. Selishchev

- Reports on progress in the growing field of biomedical technology, instrumentation, and administration
- Covers development of medical technology; new engineering methods; hospitals and patient care; and biomedical information storage and retrieval
- 92% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

*Biomedical Engineering* covers recent advances in the growing field of biomedical technology, instrumentation, and administration. Contributions focus on theoretical and practical problems associated with:

- the development of medical technology;
- the introduction of new engineering methods into public health;
- hospitals and patient care;
- the improvement of diagnosis and therapy;
- biomedical information storage and retrieval.

*Biomedical Engineering* is a translation of the peer-reviewed Russian journal *Meditsinskaya Tekhnika*. The Russian volume-year is published in English beginning in July.

Russian language information on *Meditsinskaya Tekhnika* is available at the following link: [http://www.mtjournal.ru/](http://www.mtjournal.ru/)
