Modern Otology and Neurotology

Series Ed.: K. Kaga

This series plays a role as a clinical reference in the rapidly evolving subspecialty of modern otology and neurotology. Written by prominent academic authorities, this series integrates contents from all fields of medicine and covers every aspect of the field, including surgical issues in pediatric audiology, neurotology and neurology, genetic testing, oncological study in auditory and vestibular organs, geriatric audiology and neurotology, and new clinical application of bone conduction hearing etc. Historical developments and unsolved problems of each field will also be described in detail to help readers' understanding. The editors and contributors hope that this book series will contribute to medical residents and experts of otolaryngology and related clinical medicines in the evaluation of patients with otological and neurotological disorders.
