Environmental Biology of Fishes

Editor-in-Chief: D. Noakes

- Publishes original studies on the ecology, life history, epigenetics, behavior, physiology, morphology and evolution of marine and freshwater fishes
- Deals with the relationship between fishes and their external and internal environment
- Presents editorials, papers, brief communications, essays, critical book reviews, and more

Environmental Biology of Fishes is an international journal that publishes original studies on the ecology, life history, epigenetics, behavior, physiology, morphology, systematics and evolution of marine and freshwater fishes. Empirical and theoretical papers are published that deal with the relationship between fishes and their external and internal environment, whether natural or unnatural. The journal concentrates on papers that advance the scholarly understanding of life and draw on a variety of disciplines in reaching this understanding.

Environmental Biology of Fishes publishes original papers, review papers, brief communications, editorials, book reviews and special issues. Please see the tab Article Types in the journal's Instructions for Authors for more details and submission requirements. There are no page charges to publish in this journal.

We are pleased to announce that Environmental Biology of Fishes is available Online First.

The Online First service lets users access peer reviewed articles well before print publication. These articles are searchable and citable by their DOI (Digital Object Identifier) and hence significantly reduce the time it takes for critical discoveries to reach the research community.

To view Online First articles please visit Springerlink.com.

There are no page charges to publish in this journal.

All articles accepted after February 1, 2014 will have free color online and in print.

Impact Factor: 1.255 (2016), Journal Citation Reports®
