European Journal of Wood and Wood Products
Holz als Roh- und Werkstoff
Editor-in-Chief: K. Richter; J.-W. Van de Kuilen

▶ Presents research into wood and wood products
▶ Examines biological, chemical, physical, mechanical and technological properties, and wood processing and uses
▶ Coverage ranges from roundwood to wood based products, composite materials and timber construction
▶ 100% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

European Journal of Wood and Wood Products reports on original research and new developments in the field of wood and wood products and their biological, chemical, physical as well as mechanical and technological properties, processes and uses. Subjects range from roundwood to wood based products, composite materials and structural applications, with related jointing techniques. Moreover, it deals with wood as a chemical raw material, source of energy as well as with inter-disciplinary aspects of environmental assessment and international markets.

European Journal of Wood and Wood Products aims at promoting international scientific communication and transfer of new technologies from research into practice.

Impact Factor: 1.082 (2016), Journal Citation Reports®
