Journal of Clinical Immunology

Editor-in-Chief: V. Bonagura
Deputy Editor-in-Chief: J.-L. Casanova

- Keeps researchers and academics current on developments in immunology
- Offers articles on basic, translational and clinical studies of immunology
- 96% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

The Journal of Clinical Immunology is an international journal that publishes high impact papers in the area of human immunology that explore the diagnosis, pathogenesis, prognosis, or treatment of human diseases. The Journal is particularly focused on primary immunodeficiencies and related diseases. These include inborn errors of immunity, in the broad sense of the term, their underlying genotypes, and their diverse phenotypes, including infection, malignancy, allergy, auto-inflammation, and autoimmunity. We consider a wide range of studies in this area, ranging from genetic discovery, clinical description, immunologic assessment, diagnostic approach, prognosis evaluation, and treatment intervention. This well-established journal publishes articles on basic, translational, and clinical studies including relevant animal models and case reports of general significance.

Impact Factor: 3.253 (2016), Journal Citation Reports®
