J Mol Med publishes reports describing major advances in the understanding, prevention, diagnosis, and treatment of human disease through the application of molecular biology and gene technology, a research discipline that has become known as molecular medicine.

The journal publishes original papers and review articles of the highest quality pertinent to all aspects of human biology and pathophysiology.

J Mol Med is the continuation of the Berliner Klinische Wochenschrift (1864), one of the oldest and most prestigious European journals in which great scientists such as Paul Ehrlich, Robert Koch, and Otto Warburg published their seminal; epoch-making discoveries.

Impact Factor: 4.686 (2016), Journal Citation Reports®
