Journal of Medical Systems
Editor-in-Chief: J. Ehrenfeld

- Covers new systems and methods in medical office administration; pathology, radiology, and pharmaceutical delivery systems; medical records management and more
- Offers articles, essays, and studies across the entire spectrum of medical systems
- Includes a special section devoted to status reports on current installations
- Fast online publication: most articles are published within 2 months after acceptance
- 100% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

The Journal of Medical Systems provides a forum for the presentation and discussion of the increasingly extensive applications of new information systems techniques and methods across all health care settings. It features six sections focusing on:

- Mobile & Wireless Health
- Quality Improvement
- Transaction Processing Systems
- Image & Signal Processing
- Patient Facing Systems
- Education & Training

Journal publishes informative original articles, reviews, and studies across the entire scale of medical systems, from large hospital programs to novel small-scale medical services. Education is an integral part of this amalgamation of sciences, and selected articles are published in this area.

Impact Factor: 2.456 (2016), Journal Citation Reports®
