Journal of Polymers and the Environment
formerly: 'Journal of Environmental Polymer Degradation'
Editor-in-Chief: K. Kirwan

- 100% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

The Journal of Polymers and the Environment fills the need for an international forum in this diverse and rapidly expanding field. The journal serves a crucial role for the publication of information from a wide range of disciplines and is a central outlet for the publication of high-quality peer-reviewed original papers, review articles, and short communications. The journal is intentionally interdisciplinary in regard to contributions and covers the following subjects: polymers, environmentally degradable polymers, and degradation pathways: biological, photochemical, oxidative, and hydrolytic; new environmental materials: derived by chemical and biosynthetic routes; environmental blends and composites; developments in processing and reactive processing of environmental polymers; characterization of environmental materials: mechanical, physical, thermal, rheological, morphological, and others; recyclable polymers and plastics recycling environmental testing: in-laboratory simulations, outdoor exposures, and standardization of methodologies; environmental fate: end products and intermediates of biodegradation; microbiology and enzymology of polymer biodegradation; solid-waste management and public legislation specific to environmental polymers; and other related topics.

Impact Factor: 1.877 (2016), Journal Citation Reports®
