Neurophysiology
Editor: D.A. Vasilenko

- Brings results of experimental studies in the field of neurosciences using multidisciplinary approaches
- Gives priority to publishing of new experimental data and reviews on current topics
- Focuses on research findings relating to the structure and functions of the nervous system at all levels, from molecules to the brain
- 92% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Neurophysiology is an international scientific journal. It features a broad, interdisciplinary scope, which covers studies on molecular, cellular, and systemic neurophysiology, functional neuromorphology, neuropharmacology, and neurochemistry. Papers on neuromuscular physiology, neural mechanisms of higher nervous activity and behavior, neurophysiology, medical aspects of neurophysiology, and modeling of neural functions are also accepted. Both original experimental papers and review papers on contemporary problems of neuroscience can be submitted.

Impact Factor: 0.207 (2016), Journal Citation Reports®
