Studia Logica

An International Journal for Symbolic Logic

Editor-in-Chief: J. Malinowski

- ▶ Offers papers on logical systems utilizing methods of contemporary formal logic
- ▶ Explores the application of logic to other branches of knowledge such as philosophy, the methodology of science or linguistics
- ▶ Presents monothematic issues edited by outstanding scholars

Studia Logica publishes original papers on various logical systems, which utilize methods of contemporary formal logic, such as those of algebra, model theory, proof theory and others. More specifically, the journal offers articles on topics in general logic (as defined in 1991 Mathematical Subject Classification) and on applications of logic to other branches of knowledge such as philosophy, the methodology of science or linguistics.

The distinctive feature of *Studia Logica* is its series of monothematic issues edited by outstanding scholars and devoted to important topics of contemporary logic or covering significant conferences.

This journal is also intended as an East-West link, inspiring discussion among researchers and scholars in distant places.

A special rate for the members of the Association for Symbolic Logic is available.

Impact Factor: 0.589 (2016), Journal Citation Reports®
