Acta Geotechnica

Editor-in-Chief: W. Wu

- ▶ An international journal on basic and applied research in geoen지니어링
- ▶ Explores the mechanical, physical, hydraulic and thermal properties of geomaterials as multiphase media
- ▶ Draws on applications in geoen지니어링, including foundation, dam, mining, tunneling, geohazard, geoenvironmental and petroleum engineering
- ▶ Presents research papers, review articles, short notes and letters to the editors
- ▶ 91% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Acta Geotechnica is an international journal devoted to the publication and dissemination of basic and applied research in geoen지니어링 – an interdisciplinary field dealing with geomaterials such as soils and rocks. Coverage emphasizes the interplay between geomechanical models and their engineering applications. The journal presents original research papers on fundamental concepts in geomechanics and their novel applications in geoen지니어링 based on experimental, analytical and/or numerical approaches. The main purpose of the journal is to foster understanding of the fundamental mechanisms behind the phenomena and processes in geomaterials, from kilometer-scale problems as they occur in geoscience, and down to the nano-scale, with their potential impact on geoen지니어링. The journal strives to report and archive progress in the field in a timely manner, presenting research papers, review articles, short notes and letters to the editors.

Indexed by SCOPUS, Ulrich's, MetaPress, Swets Informatin Services, Thomson Gale, IngentaConnect and Springerlink.

Impact Factor: 2.801 (2016), Journal Citation Reports®
