Stratigraphy and Geological Correlation

Editor-in-Chief: M.A. Semikhatov

- Unique in its coverage of stratigraphy and correlation of geological events and processes
- Multidisciplinary research underlies all coverage
- Directed toward researchers, university professors, students, and geologists

Stratigraphy and Geological Correlation (Stratigrafiya, Geologicheskaya Korrelyatsiya) is unique in offering comprehensive coverage of the fundamental and applied aspects of stratigraphy and the correlation of geological events and processes in time and space. Articles are based on the results of multidisciplinary research, and are directed toward researchers, university professors, students, and geologists interested in understanding stratigraphy and the chronological features of the world’s geological record.

Impact Factor: 0.744 (2016), Journal Citation Reports®
