Journal of Systems Science and Systems Engineering
Editor-in-Chief: J. Chen

- Addresses the theory, methodology, and applications underlying systems science and systems engineering
- Fosters new research to help decision-makers understand the mechanisms and complexity of economic, engineering, management, social, and technological systems
- Presents new developments in theory and practice that can improve the performance of systems
- Founded by the Systems Engineering Society of China

The Journal of Systems Science and Systems Engineering was founded by the Systems Engineering Society of China in 1992. Published quarterly, this international journal addresses the theory, methodology, and applications underlying systems science and systems engineering.

The mission of the journal is to foster new thinking and research to help decision-makers understand the mechanisms and complexity of economic, engineering, management, social, and technological systems. Moreover, the journal helps readers discover new developments in theory and practice that can improve the performance of systems.

Impact Factor: 0.915 (2016), Journal Citation Reports®
