Algebra universalis
Editor-in-Chief: F. Wehrung

_algebra universalis_ publishes papers in universal algebra, lattice theory, and related fields. In a pragmatic way, one could define the areas of interest of the journal as the union of the areas of interest of the members of the Editorial Board. In addition to research papers, we are also interested in publishing high quality survey articles.

Papers of more than 40 pages are discouraged, and papers of more than 50 pages are not normally considered.

The Mailbox contains short communications in our areas of interest.

*Submissions are made electronically; please see the Instructions to Authors here on the right hand side column.*
