Molecular Neurobiology
Editor-in-Chief: N.G. Bazan

- 96% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again.

Molecular Neurobiology is an exciting review journal for neuroscientists who wish to stay in close touch with progress at the forefront of contemporary molecular brain research. It is specifically designed to synthesize and critically assess research trends for all neuroscientists at the cutting edge of this dramatically developing area. The journal has proven to be crucial in departmental libraries, serving as essential reading for every committed neuroscientist striving to keep abreast of rapid developments in a forefront field. Each topic chosen for review is thoroughly analyzed by scientists and clinicians internationally renowned for their special competence in the areas treated.

Impact Factor: 6.190 (2016), Journal Citation Reports®
