The Cerebellum
Editor-in-Chief: M. Manto

- A dedicated source for news and research results on the cerebellum and its role in ataxia and other disorders
- Spans a broad range of fields including fundamental neurosciences, neurophysiology, neuropathology, cognition and neuroimaging
- Official publication of the Society for Research on the Cerebellum
- 100% of authors who answered a survey reported that they would definitely publish or probably publish in the journal again

Official publication of the Society for Research on the Cerebellum devoted to genetics of cerebellar ataxias, role of cerebellum in motor control and cognitive function, and amid an ageing population, diseases associated with cerebellar dysfunction.

The Cerebellum is a central source for the latest developments in fundamental neurosciences including molecular and cellular biology; behavioural neurosciences and neurochemistry; genetics; fundamental and clinical neurophysiology; neurology and neuropathology; cognition and neuroimaging.

The Cerebellum benefits neuroscientists in molecular and cellular biology; neurophysiologists; researchers in neurotransmission; neurologists; radiologists; paediatricians; neuropsychologists; students of neurology and psychiatry and others.

Impact Factor: 3.234 (2016), Journal Citation Reports®
