Advances in Therapy
Managing editor: A. Brown

Advances in Therapy publishes papers online 3-4 weeks from acceptance, therefore every article is fast-tracked. Versatile in-house production is focused to the deadlines of the author. The journal offers a range of additional features designed to enhance the educational content of its research. Each paper is accompanied by a bulleted slide summary for a time-efficient overview of the content. Articles also have the option to include various other types of enhanced features including slide sets, videos and animations. These features are published alongside the article on the bespoke journal website: www.advancesintherapy.com

Advances in Therapy is an international, peer reviewed, rapid-publication (peer review in 2 weeks, published 3–4 weeks from acceptance) journal dedicated to the publication of high-quality clinical (all phases), observational, real-world, and health outcomes research around the discovery, development, and use of therapeutics and interventions (including devices) across all therapeutic areas. Studies relating to diagnostics and diagnosis, pharmacoconomics, public health, epidemiology, quality of life, and patient care, management, and education are also encouraged.

Advances in Therapy is of interest to a broad audience of pharmaceutical and healthcare professionals and publishes original research and reviews. The journal appeals to a global audience and receives submissions from all over the world.

Moving forward from traditional publishing, Advances in Therapy offers a range of additional features designed to increase visibility and readership. Each paper is accompanied by a bulleted slide summary, giving a time-efficient overview of the content to a wider readership. Articles also have the option to include various other types of enhanced features including slide sets, videos and animations. All enhanced features are open access and are peer reviewed to the same high standard as the article itself.

Please note: Advances in Therapy's open access articles are published under the Creative Commons Attribution-Noncommercial License, which allows users to read, copy, distribute, and make derivative works for non-commercial purposes from the material, as long as the author of the original work is cited. The author assigns the exclusive right to any commercial use of the article to Springer.

Impact Factor: 2.272 (2014), Journal Citation Reports®, Thomson Reuters
