## Lecture Notes in Artificial Intelligence

### Subseries of Lecture Notes in Computer Science

Series Editors: R. Goebel, Y. Tanaka, W. Wahlster

LNAI was established in the mid-1980s as a topical subseries of LNCS focusing on artificial intelligence.

This subseries is devoted to the publication of state-of-the-art research results in artificial intelligence, at a high level and in both printed and electronic versions - making use of the well-established LNCS publication machinery. As with the LNCS mother series, proceedings and postproceedings are at the core of LNAI; however, all other sublines are available for LNAI as well.

The topics in LNAI include automated reasoning, automated programming, algorithms, knowledge representation, agent-based systems, intelligent systems, expert systems, machine learning, natural-language processing, machine vision, robotics, search systems, knowledge discovery, data mining, and related programming languages.
