European Transport Research Review

An Open Access Journal
Editor-in-Chief: K. Geurs

► International open access journal on transportation, with a special focus on European transport policymakers and the transport research community
► Bridges the gap between social science research and engineering practice on transportation
► Covers all disciplines within the social sciences and engineering as applied to transportation
► Reports on all modes of transport
► Intended to foster the application of research outcomes to mainstream transport policy and practice
► Provides an opportunity for themed collections from major European projects, the European Transport Research Arena and the European Transport Conference

European Transport Research Review (ETRR) is a peer-reviewed open access journal publishing original high-quality scholarly research and developments in areas related to transportation science, technologies, policy and practice. Established in 2008 by the European Conference of Transport Research Institutes (ECTRI), the journal provides researchers and practitioners around the world with an authoritative forum for the dissemination and critical discussion of new ideas and methodologies that originate in, or are of special interest to, the European transport research community. The journal is unique in its field, as it covers all modes of transport and addresses both the engineering and the social science perspective, offering a truly multidisciplinary platform for researchers, practitioners, engineers and policymakers.

Impact Factor: 0.962 (2016), Journal Citation Reports®

Giving authors in their area of expertise the opportunity to publish open access
► High visibility thanks to unrestricted online access
► Rigorous peer-review and high-quality author services
► Creative Commons licensed – authors retain copyright
► Citation tracking and inclusion in bibliographic databases
► Easy compliance with open access mandates
