Journal of Visualization
Editor-in-Chief: K. Koyamada; K.C. Kim

- Official journal of the Visualization Society of Japan
- One of the few journals that concentrate on experimental methods in fluids
- Steadily growing citation rate over the last years
- Represents the strong Japanese contribution to the area

Visualization is an interdisciplinary imaging science devoted to making the invisible visible through the techniques of experimental visualization and computer-aided visualization. This official journal of the Visualization Society of Japan presents the latest visualization technology and its applications. It is published in full color in order to realize its mission of promoting a better understanding of complex phenomena.

The journal consists of papers, such as short paper, review paper, regular paper, and report.

Impact Factor: 0.575 (2014), Journal Citation Reports®, Thomson Reuters
