Genetics Selection Evolution is an open access, peer-reviewed, online journal dedicated to original research on all aspects of genetics and selection in domestic animal species and other species providing results of immediate interest for farm animals' genetics.

With the vast, recent increase in the amount and spectrum of available genetic and genomic data, and the development of next-generation sequencing-based approaches, there is an ever-increasing requirement for the collaboration and successful integration of varied results, techniques, and methods in furthering the advancement of the future of animal genetics.

Genetics Selection Evolution focuses on contributing to these developments by providing a high-visibility forum for the dissemination of relevant research and reviews that will prompt new insights and discussions as well as stimulate new research in the field.

Genetics Selection Evolution is owned and supported by the Animal Health Division of the French National Institute for Agricultural Research (INRA).

Impact Factor: 2.964 (2016), Journal Citation Reports®

Giving authors in their area of expertise the opportunity to publish open access

- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
