**BMC Bioinformatics**

- Considers articles focusing on all aspects of bioinformatics and computational biology
- Ranked 3rd for bioinformatics in SCImago and 1st open access journal in the same category
- Large international readership with over half a million article accesses on average per month

*BMC Bioinformatics* is part of the *BMC* series which publishes subject-specific journals focused on the needs of individual research communities across all areas of biology and medicine. We do not make editorial decisions on the basis of the interest of a study or its likely impact. Studies must be scientifically valid; for research articles this includes a scientifically sound research question, the use of suitable methods and analysis, and following community-agreed standards relevant to the research field.

Specific criteria for other article types can be found in the submission guidelines.

*BMC* series - open, inclusive and trusted.

Impact Factor: 2.448 (2016), Journal Citation Reports®

Giving authors in their area of expertise the opportunity to publish open access
- High visibility thanks to unrestricted online access
- Rigorous peer-review and high-quality author services
- Creative Commons licensed – authors retain copyright
- Citation tracking and inclusion in bibliographic databases
- Easy compliance with open access mandates
